Independent auditor's report

To the Members of GraceKennedy Limited

Report on the audit of the consolidated financial and stand-alone statements

Our opinion

In our opinion, the consolidated financial statements and stand-alone financial statements give a true and fair view of the consolidated financial position of GraceKennedy Limited (the Company) and its subsidiaries (together the Group) and the stand alone financial position of the Company as at 31 December 2016, and of their consolidated and stand-alone financial performance and their consolidated and stand-alone cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and the requirements of the Jamaican Companies Act.

What we have audited

GraceKennedy Limited's consolidated and stand-alone financial statements comprise:

- the consolidated and stand-alone statements of financial position as at 31 December 2016;
- the consolidated and stand-alone income statements and statements of comprehensive income for the year then ended;
- the consolidated and stand-alone statements of changes in equity for the year then ended;
- · the consolidated and stand-alone statements of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated and stand-alone financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Our audit approach

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industries in which the Group operates.

In assessing the risk of material misstatement to the Group financial statements, and to ensure we had adequate quantitative coverage of significant accounts in the financial statements we designed and performed audit procedures over various components. The Group comprised 41 reporting components of which, we selected 18 components which represent the principal business units within the Group and covered entities within Jamaica, Barbados, the Eastern Caribbean, Trinidad and Tobago, Canada, the United Kingdom, the United States of America and Guyana.

Of the 18 components selected, we performed an audit of the complete financial information of 12 components ("full scope components") which were selected based on their size, risk characteristics or both. For the remaining 6 components ("specific scope components"), we performed audit procedures on specific accounts and or analytical procedures within that component that we considered had the potential for the greatest impact on the significant accounts in the financial statements either due to the size of these accounts or their risk profile. The audit scope of these components may not have included testing of all significant accounts of the component but will have contributed to the coverage of significant accounts tested for the Group.

In relation to the remaining components, none of which are individually greater than 2% of the Group's profit before tax we performed other procedures, including analytical review procedures and testing of consolidation journals, intercompany eliminations and foreign currency translation recalculations to respond to any potential risks of material misstatement to the Group financial statements.

For components that are in scope of the Group audit, we used component auditors from PwC network firms and non PwC firms who are familiar with the local laws and regulations to perform this audit work. Throughout the audit we had regular meetings and correspondence with management and component auditor teams to follow up progress of work for all components. The group team engagement leader and the senior members of the group engagement team reviewed reports about the audit approach and findings of the component auditors.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter How our matter	ir audit addressed the key audit
America (USA) operations (Group) impairmer the future	I management's assumptions used in their ent testing model for goodwill, including e cash flow projections, discount rates and rates applied. The following procedures ormed;
The total carrying value of goodwill is \$1.409 billion of which \$957 million relates to the USA operations. The assessment of the carrying value of goodwill involves judgement in relation to forecasting future cash flows and is sensitive to growth rates and discount rates applied to the future cash flows. We have focused on the United States operations as aspects of it are still in the process of being integrated within the Group; through its efforts to increase operational efficiencies and improve distribution channels since the acquisition in 2014 of the LaFe operation. We we follow We we follow The total carrying value of goodwill involves judgement in relation to forecasting future cash flows and is sensitive to growth rates and discount rates applied to the future cash flows. We have focused on the United States operations as aspects of it are still in the process of being integrated within the Group; through its efforts to increase operational efficiencies and improve distribution channels since the acquisition in 2014 of the LaFe operation.	obtained management's discounted cash model (DCF) including qualitative and ntitative analyses and obtained an erstanding of the process used by nagement to determine fair value of the orting unit dested the mathematical accuracy, uding verifying spreadsheet formulas, of DCF model agreed the 31 December 2016 base year incial information to audited results and apared the current year forecast to most ent audit results verified management's assumptions as lows: **Revenue growth rates - we compared the revenue growth rates to historical revenue growth, industry analysis and peer data; **Gross & EBITDA margins - We compared gross margins to historical results, reconciling variances to underlying supporting data and current period results; **Tax rates - we compared the tax rate to the entity's effective tax rate; **Capital expenditures - we compared capital expenditures to historical amounts and discussed with management their capital expenditure plans;

How our audit addressed the key audit
matter
Working capital requirements – we compared the forecasted amounts to historical working capital requirements. Additionally, we utilized our PwC valuation specialists to review the trend in working capital requirements as compared to the entity's growth and benchmarked against peer companies; and
WACC & terminal value – we engaged our PwC valuation specialists to review weighted average cost of capital (WACC) and terminal value whereby they developed a range of parameters using available market inputs and performed sensitivity analyses using these parameters to determine the reasonableness of management's fair value measurements
sensitivity analysis was performed by looking at changes in management's revenue growth rates, gross margin, EBITDA margin and WACC, and changes in working capital requirements
we considered subsequent events and impact on the entity's cash flows and forecasts
There were no significant exceptions noted from our procedures performed above. We found the assumptions to be consistent and in line with our expectations.
We evaluated management's assumptions made in relation to the valuations of the liabilities and assets in the pension plans and the assumptions around salary increases and mortality rates by comparing them to national and industry averages.
We performed the following procedures on the valuations of pension plan liabilities and the pension assets as follows: • we agreed the discount and inflation rates used in the valuation of the pension liability to that issued by the Institute of Chartered Accountants of Jamaica; • we reviewed the audit work papers of the auditors of the pension scheme in relation to work on the fair valuation of pension assets;

Key audit matter How our audit addressed the key audit matter We focused on this areas as the valuation of the pension we tested the completeness and accuracy of liabilities requires significant levels of judgement and data extracted and supplied to the Group's technical expertise in choosing appropriate assumptions. A actuary, which is used to calculate the pension number of the key assumptions can have a material impact scheme surplus or deficit; and on the calculation of the liability including; we engaged our actuarial specialist and liaised with management and their actuary to salary increases understand and review the judgements made in inflation determining key economic assumptions used in discount rates and: the calculation of the liability. mortality rates

The pension assets include significant pension asset investments, the fair value measurement of which includes some judgement.

Management uses external actuaries to assist in determining these assumptions and in valuing the gross assets and liabilities within the pension plan. Based on the audit evidence obtained, we determined that the data and assumptions used by management in the actuarial valuations and determination of the fair value of the scheme assets were supported by the available audit evidence.

Credit risk and impairment of loans and advances to customers (Group)

Refer to notes 2(h), 4(viii) and 9 of the consolidated financial statements for disclosures of related accounting policies, judgments and estimate and balances.

The Group has loans receivable balances disclosed in Note 9 which are significant in the context of the overall Group statement of financial position representing 20% of total assets.

Included in loan receivables are loans and advances to customers amounting to \$25.360 billion, of which \$1.451 billion is impaired and \$582 million is subject to an impairment charge.

Impairment is a subjective area due to the level of judgement applied by management in determining provisions.

We understood and tested the operating effectiveness of controls impacting impairment and focused on:

- credit approval being supported by proper documentation and appropriate loan underwriting in accordance with the Group's policies;
- automated identification of loans classified as delinquent by the system and days outstanding correctly reflected; and
- adjustments for credit losses are supported, correctly posted and appropriately approved.

We found that these key controls were designed, implemented and operated effectively, and therefore we determined that we could place reliance on these key controls for the purposes of our audit.

Key audit matter

We focused on the impairment assessment as the assumptions used for estimating both the amount and timing of future cash flows are complex and involve significant judgment by management, including:

- Classification of loans as impaired: we focused on the completeness of the customer accounts that are included in the impairment assessment;
- Valuation of real estate property pledged as collateral: this
 is the most significant repayment source for impaired
 mortgages and impaired commercial loans. The
 estimation of collateral values is impacted by market
 trends as well as the circumstances of the specific
 property and involves judgment and specialised skills; and
- The key assumptions and judgments made by management when calculating the provision for individually impaired loans and loan portfolio by sector collectively. Key assumptions and judgments include the estimated costs to sell the collateral, time to liquidate the pledged collateral and the amount and timing of collection of cash flows from other sources than pledged collateral as well as default rates.

How our audit addressed the key audit matter

In addition, we have performed the following substantive procedures:

- we understood management's basis for determining whether a loan is impaired as disclosed in Note 2(h) and assessed the reasonableness using our understanding of the Group's lending portfolios and our broader industry knowledge;
- we tested completeness of the loan provision balance based on non-performing loans within the portfolio and considered the reasonableness of management's assumptions in prior year based on the realised value of the security sold. No exceptions were noted;
- we tested a sample of performing loans and examined the status of the loan account subsequent to year end to determine if there were any indicators of impairment. We did not identify impairment events;
- for a sample of non-performing loans we gained an understanding of the latest developments at the borrowers and the basis of measuring the impairment provisions and considered whether key judgments were appropriate given the borrowers' circumstances. We also re-performed management's impairment calculation. In addition, we tested key inputs to the impairment calculation including the expected future cash flows and valuation of collateral held, and determined reasonableness of valuation of real estate collateral based on use of our auditors' expert. Where cash flows are from real estate, sensitivity analyses were performed by varying the time taken to sell the property;
- where we identified individually significant loan accounts which were experiencing financial difficulties individual impairment assessments were performed by examining the borrowers' circumstances subsequent to year end and comparing the value of collateral related to the facilities and;

Key audit matter	How our audit addressed the key audit matter
	we tested management's impairment assessment calculation for loans by sector by evaluating the default rate model, compared inputs to relevant data including historical loss experience for loans with similar risk characteristics. We also checked the calculations for mathematical accuracy, noting no exceptions. From the testing performed we found no significant additional impairment provisions for loan balances identified.

Other information

Management is responsible for the other information. The other information comprises the Annual Report (but does not include the financial statements and our auditor's report thereon), which is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated and stand-alone financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and stand-alone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated and standalone financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the consolidated and stand-alone financial statements

Management is responsible for the preparation and fair presentation of the consolidated and standalone financial statements in accordance with International Financial Reporting Standards and the requirements of the Jamaican Companies Act, and for such internal control as management determines is necessary to enable the preparation of consolidated and stand-alone financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and stand-alone financial statements, management is responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group, Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group and Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and stand-alone financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated and stand-alone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and stand-alone financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and stand-alone
 financial statements, whether due to fraud or error, design and perform audit procedures
 responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a
 basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is
 higher than for one resulting from error, as fraud may involve collusion, forgery, intentional
 omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Group and Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and stand-alone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group or Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and stand-alone
 financial statements, including the disclosures, and whether the consolidated and stand-alone
 financial statements represent the underlying transactions and events in a manner that achieves
 fair presentation.

 Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated and stand-alone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

As required by the Jamaican Companies Act, we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit.

In our opinion, proper accounting records have been kept, so far as appears from our examination of those records, and the accompanying financial statements are in agreement therewith and give the information required by the Jamaican Companies Act, in the manner so required.

The engagement partner on the audit resulting in this independent auditor's report is Peter Williams.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

1. Identification

GraceKennedy Limited (the company) is a company limited by shares, incorporated and domiciled in Jamaica. The registered office of the company is located at 73 Harbour Street, Kingston, Jamaica.

The company is a publicly listed company having its primary listing on the Jamaica Stock Exchange, with further listing on the Trinidad and Tobago Stock Exchange.

The Group is organised into two divisions namely, GK Foods and GK Financial Group. The GK Foods division comprises all the food related companies while the GK Financial Group division comprises all the financial services companies in the Group. For the purpose of segment reporting the Group reports its results under the four segments described below.

The principal activities of the company, its subsidiaries and its associated companies (the Group) are as follows:

Food Trading -

Merchandising of general goods and food products, both locally and internationally; processing and distribution of food products; and the operation of a chain of supermarkets.

Banking and Investments -

Commercial banking; investment management; lease and trade financing; stock brokerage; and property rental.

Insurance -

General insurance and insurance brokerage.

Money Services -

Operation of money transfer services, cambio operations and bill payment services.

The Retail and Trading operations; which merchandises agricultural supplies, home improvement supplies, and hardware and lumber; is a discontinued operation which was disposed of in the prior year. The performance of these operations is not presented in the segment results and instead information about this discontinued segment is provided in Note 40.

Significant Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied for all the years presented, unless otherwise stated.

Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), and have been prepared under the historical cost convention as modified by the revaluation of certain fixed and financial assets, investment properties and financial liabilities.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

Standards, interpretations and amendments to published standards effective in the current year

Certain amendments and clarifications to existing standards have been published that became effective during the current financial year. The Group has assessed the relevance of all such new amendments and clarifications and has put into effect the following, which are immediately relevant to its operations.

- Annual Improvements to IFRSs 2012-2014 cycles, effective for periods beginning on or after 1 January 2016. There was no impact from adoption of these amendments and clarifications.
- Amendment to IFRS 11, Joint arrangements' (effective for the periods beginning on or after 1 January 2016), clarifies the accounting for the acquisition of an interest in a joint operation where the activities of the operation constitute a business. This amendment requires an investor to apply the principles of business combination accounting when it acquires an interest in a joint operation that constitutes a business. There was no impact from adoption of this amendment, as there were no acquisitions of joint arrangements during the year.

Notes to the Financial Statements
31 December 2016
(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(a) Basis of preparation (continued)

Standards, interpretations and amendments to published standards effective in the current year (continued)

- Amendments to IAS 16, 'Property, Plant and Equipment' and IAS 38, 'Intangible Assets' Clarification of Acceptable Methods of
 Depreciation and Amortisation, (effective for the periods beginning on or after 1 January 2016). In these amendments, the IASB has
 clarified that the use of revenue-based methods to calculate the depreciation of an asset is not appropriate because revenue
 generated by an activity that includes the use of an asset generally reflects factors other than the consumption of the economic
 benefits embodied in the asset. There was no impact from adoption of this amendment, as the Group does not use revenue-based
 depreciation or amortisation methods.
- Amendments to IAS 27, 'Separate financial statements' (effective for annual periods beginning on or after 1 January 2016). This
 amendment allows entities to use the equity method to account for investments in subsidiaries, joint ventures and associates in their
 separate financial statements. An entity can now account for investments in subsidiaries, joint ventures and associates in its separate
 financial statements: a) at cost; or b) in accordance with IFRS 9; or c) using the equity method as described in IAS 28. The IASB has
 also clarified the definition of separate financial statements. There was no impact from adoption of this amendment, as the Group has
 opted to continue to account for its investments in subsidiaries and associates at cost in its separate financial statements.
- Amendments to IFRS 10 and IAS 28 (effective for annual periods beginning on or after 1 January 2016). The amendments clarify the
 relief from consolidation which is available to entities in group structures involving investment entities and are likely to reduce the
 number of entities which produce consolidated financial statements. The amendments also provide relief to non-investment entity
 investors in associates and joint ventures, who would otherwise incur practical difficulties or additional costs in unwinding fair value
 measurements and performing additional consolidations. There was no impact from adoption of this amendment.
- Amendment to IAS 1, 'Presentation of Financial Statements', (effective for annual periods beginning on or after 1 January 2016). This amendment forms part of the IASB's Disclosure Initiative, which explores how financial statement disclosures can be improved. It clarifies guidance in IAS 1 on materiality and aggregation, the presentation of subtotals, the structure of financial statements and the disclosure of accounting policies. The amendment also clarifies that the share of other comprehensive income (OCI) of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, classified between those items that will or will not be subsequently reclassified to profit or loss. The effect of adopting this amendment is that \$24,327,000 (2015: -\$10,237,000) of the OCI of associates is now shown under items that will not be reclassified to profit or loss.

Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group

At the date of authorisation of these financial statements a number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2016, and have not been applied in preparing these consolidated financial statements. None of these is expected to have a significant effect on the consolidated financial statements of the Group, except the following set out below:

• IFRS 9, 'Financial instruments', addresses the classification, measurement and recognition of financial assets and financial liabilities. The complete version of IFRS 9 was issued in July 2014. It replaces the guidance in IAS 39 that relates to the classification and measurement of financial instruments. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through profit or loss. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling. There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually use for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39. The standard is effective for accounting periods beginning on or after 1 January 2018. Early adoption is permitted. The Group is currently assessing the impact of IFRS 9.

Notes to the Financial Statements
31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

- 2. Significant Accounting Policies (Continued)
 - (a) Basis of preparation (continued)

Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group (continued)

- IFRS 15, 'Revenue from contracts with customers' deals with revenue recognition and establishes principles for reporting useful
 information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising
 from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus
 has the ability to direct the use and obtain the benefits from the good or service. The standard replaces tAS 18 'Revenue' and
 IAS 11 'Construction contracts' and related interpretations. The standard is effective for annual periods beginning on or after 1
 January 2018 and earlier application is permitted. The Group is currently assessing the impact of IFRS 15.
- Amendment to IFRS 15, 'Revenue from contracts with customers' (effective for annual periods beginning on or after 1 January 2018).
 These amendments comprise clarifications of the guidance on identifying performance obligations, accounting for licences of intellectual property and the principal versus agent assessment (gross versus net revenue presentation). The IASB has also included additional practical expedients related to transition to the new revenue standard.
- IFRS 16 'Leases' (effective for annual periods beginning on or after 1 January 2019). This standard replaces the current guidance in IAS 17. Under IAS 17, lessees were required to make a distinction between a finance lease (on balance sheet) and an operating lease (off balance sheet). IFRS 16 now requires lessees to recognise a lease liability reflecting future lease payments and a 'right-of-use asset' for virtually all lease contracts. The standard includes an optional exemption for certain short-term leases and leases of low-value assets; however, this exemption can only be applied by lessees. For lessors, the accounting stays almost the same. The Group is currently assessing the impact of IFRS 16.
- Amendments to IFRS 4 'Insurance Contracts' (effective for annual periods beginning on or after 1 January 2018). This amendment addresses the concerns of insurance companies about the different effective dates of IFRS 9, 'Financial instruments', and the forthcoming new insurance contracts standard. The amendment to IFRS 4 provides two different solutions for insurance companies: a temporary exemption from IFRS 9 for entities that meet specific requirements (applied at the reporting entity level); and the 'overlay approach'. Both approaches are optional. IFRS 4 (including the amendments that have now been issued) will be superseded by the forthcoming new insurance contracts standard. Accordingly, both the temporary exemption and the 'overlay approach' are expected to cease to be applicable when the new insurance standard becomes effective. The Group is currently assessing whether to use temporary exemption or overlay approach as permitted under the standard.
- Amendments to IAS 12, 'Income Taxes' (effective for annual periods beginning on or after 1 January 2017). The amendments clarify the accounting for deferred tax where an asset is measured at fair value and that fair value is below the asset's tax base. They also clarify certain other aspects of accounting for deferred tax assets. Deferred tax assets are assessed in combination with other deferred tax assets where the tax law does not restrict the source of taxable profits against which particular types of deferred tax assets can be recovered. Where restrictions apply, deferred tax assets are assessed in combination only with other deferred tax assets of the same type. The amendment also clarifies that tax deductions resulting from the reversal of deferred tax assets are excluded from the estimated future taxable profit that is used to evaluate the recoverability of those assets. The Group is currently assessing the impact of this amendment.
- Amendments to IAS 7, 'Statement of Cash flows' (effective for annual periods beginning on or after 1 January 2017). The
 amendment introduces an additional disclosure that will enable users of financial statements to evaluate changes in liabilities
 arising from financing activities. The amendment is part of the IASB's Disclosure Initiative, which continues to explore how
 financial statement disclosure can be improved. An entity is required to disclose information that will allow users to understand
 changes in liabilities arising from financing activities. This includes changes arising from cash flows, such as drawdowns and
 repayments of borrowings; and non-cash changes, such as acquisitions, disposals and unrealised exchange differences. The
 adoption of this amendment is expected to impact the nature and extent of the Group's disclosures.
- Amendments to IFRS 2, 'Share-based Payment' (effective for annual periods beginning on or after 1 January 2018). The amendment addresses the accounting for cash-settled, share-based payments and equity-settled awards that include a 'net settlement' feature in respect of withholding taxes. The amendment clarifies the measurement basis for cash-settled, share-based payments and the accounting for modifications that change an award from cash-settled to equity-settled. It also introduces an exception to the principles in IFRS 2 that will require an award to be treated as if it was wholly equity-settled, where an employer is obliged to withhold an amount for the employee's tax obligation associated with a share-based payment and pay that amount to the tax authority. The Group is currently assessing the impact of this amendment.
- Amendment to IAS 40, 'Investment property' (effective for annual periods beginning on or after 1 January 2018). These amendments
 clarify that to transfer to, or from investment properties, there must be a change in use. To conclude if a property has changed use
 there should be an assessment of whether the property meets the definition. This change must be supported by evidence.
- IFRIC 22, 'Foreign currency transactions and advance consideration' (effective for annual periods beginning on or after 1 January 2018). This IFRIC addresses foreign currency transactions or parts of transactions where there is consideration that is denominated or priced in a foreign currency. The interpretation provides guidance for when a single payment/receipt is made as well as for situations where multiple payments/receipts are made. The Group is currently assessing the impact of this amendment.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(a) Basis of preparation (continued)

Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group (continued)

- Annual improvements to IFRSs 2014 2016 cycles. These amendments impact two standards which are relevant to the Group's
 operations as follows:
 - IFRS 12, Disclosure of Interests in other entities' regarding clarification of the scope of the standard. These amendments should be applied retrospectively for annual periods beginning on or after 1 January 2017.
 - IAS 28, 'Investments in associates and joint ventures' regarding measuring an associate or joint venture at fair value, effective 1
 January 2018.

There are no other IFRS or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Group.

(b) Basis of consolidation

Subsidiaries are all entities (including structured entities) over which the Group has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. The Group also assesses existence of control where it does not have more than 50% of the voting power but is able to govern the financial and operating policies by virtue of de-facto control. De-facto control may arise in circumstances where the size of the Group's voting rights relative to the size and dispersion of holdings of other shareholders give the Group the power to govern the financial and operating policies, etc.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date through profit or loss. Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

Goodwill is initially measured as the excess of the aggregate of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest over the fair value of the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognised in profit or loss.

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from inter-company transactions that are recognised in assets are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

The special purpose entity consolidated is the company's employee investment trust.

During the year GraceKennedy Money Services (Turks & Caicos Islands) Limited was capitalised.

In 2016, the Group increased its shareholdings in EC Global Insurance Company Limited from 80% to 89.3% through the purchase of additional shares issued by that company (Note 22).

The Group liquidated GraceKennedy Logistics Services Limited, GraceKennedy (Caribbean) Limited, GraceKennedy Trade Finance Limited and GraceKennedy Remittance Services (Turks and Caicos) Limited during the year. This resulted in a gain being realised on liquidation which is included in Other Income within *gain on disposal of investments* (Note 26).

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(c) Associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investee after the date of acquisition. The Group's investment in associates includes goodwill identified on acquisition, net of any accumulated impairment loss.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of its associates' post-acquisition profits or losses is recognised in the income statement, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of results of associated companies' in the income statement.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group. Dilution gains and losses arising in investments in associates are recognised in the income statement.

In the company's statement of financial position, investment in associates is shown at cost.

The Group's associated companies are as follows:

	Financial Reporting	Country of	Nature of		
	Year-end	Incorporation	Business	Group's Percentage Interest	
				2016	2015
CSGK Finance Holdings Limited	31 December	Barbados	Banking	40.0	40.0
Dairy Industries (Jamaica) Limited	31 December	Jamaica	Food trading	50.0	50.0
Trident Insurance Company Limited	30 June	Barbados	Insurance	30.0	30.0
Telecommunications Alliance Limited	31 December	Jamałca	Dormant	49.0	49.0

The results of associates with financial reporting year-ends that are different from the Group are determined by prorating the results for the audited period as well as the period covered by management accounts to ensure that a year's result is accounted for where applicable.

(d) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Executive Committee that makes strategic decisions.

(e) Foreign currency translation

Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Jamaican dollars, which is the company's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges. Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement in other income.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continue)

(e) Foreign currency translation (continued)

Foreign exchange gains and losses are presented in the income statement within 'other income'.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in the income statement, and other changes in the carrying amount are recognised in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities are reported as part of the fair value gain or loss. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in the income statement as part of the fair value gain or loss. Translation differences on non-monetary financial assets such as equities classified as available for sale are recognised in other comprehensive income.

Group companies

The results and financial position of all the Group's entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- (b) Income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- (c) all resulting exchange differences are recognised in other comprehensive income.

When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are recognised in the income statement as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

(f) Fixed assets

All fixed assets are initially recorded at cost. Freehold land and buildings are subsequently shown at market valuation based on biennial valuations by external independent valuers, less subsequent depreciation of buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount. All other fixed assets are carried at cost less accumulated depreciation.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised.

Increases in carrying amounts arising on revaluation are credited to other comprehensive income and shown in capital reserves in shareholders' equity. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against capital reserves directly in equity; all other decreases are charged to the income statement.

Depreciation is calculated on the straight line basis to allocate assets' cost or revalued amounts to their residual values over their estimated useful lives, as follows:

Freehold buildings and leasehold buildings and improvements Plant, machinery, equipment, furniture and fixtures Vehicles

10 - 60 years

3 - 10 years

3 - 5 years

Land is not depreciated.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each statement of financial position date.

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(f) Fixed assets (continued)

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposal of fixed assets are determined by reference to their carrying amount and are taken into account in determining profit. When revalued assets are sold, the amounts included in capital and fair value reserves are transferred to retained earnings.

Repairs and maintenance are charged to the income statement during the financial period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group. Major renovations are depreciated over the remaining useful life of the related asset.

Borrowing costs incurred for the construction of any qualifying asset are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Other borrowing costs are expensed.

(g) Intangible assets

Goodwill

Goodwill is recorded at cost and represents the excess of the value of consideration paid over the Group's interest in net fair value of the identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree, Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to operating segment.

Computer software

Acquired computer software licences are capitalised on the basis of costs incurred to acquire and bring to use the specific software. These costs are amortised over the estimated useful life of the software, which ranges from 3 to 5 years.

Distribution channel agreements

Distribution channel agreements are recorded at cost and represent the value of the consideration paid to acquire rights to distribute beverages in specified routes. These costs are amortised over the estimated useful life of the agreements, which is 10 years.

Policy contracts

Policy contracts are amortised over their estimated useful life which is 15 years and are carried at cost less accumulated amortisation. The cost of policy contracts comprises its purchase price and professional fees directly attributed to acquiring the asset.

Brands

Brands are recorded at cost and represent the value of the consideration paid to acquire several well established and recognised beverage and ethnic food brands. These costs are amortised over the estimated useful life of the brands, which ranges from 5 to 20 years.

Customer relationships

Customer relationships are recorded at cost and represent the value of the consideration paid to acquire customer contracts and the related customer relationships with several outlet operators and insurance clients. These costs are amortised over the estimated useful life of the relationships, which is between 5 to 15 years.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(h) Financial assets

The Group classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, and available for sale. The accounting policy for trade and insurance receivables is dealt with in Note 2 (o). The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition. A financial instrument is any contract that gives rise to both a financial asset in one entity and a financial liability or equity of another entity.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are also categorised as held for trading unless they are designated as hedges. Assets in this category are classified as current assets if expected to be settled with 12 months, otherwise they are classified as non-current.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are classified as such in the statement of financial position.

Financial assets classified as loans and receivables either meet the definition of loans and receivables at the date of acquisition, or at the date of reclassification from another category (fair value through profit or loss or available-for-sale), under the provisions of IAS 39 (Amendment). Financial assets which have been reclassified to this category, meet the definition of loans and receivables as a result of the market for these securities becoming inactive during the financial year.

A provision for credit losses is established if there is objective evidence that a loan is impaired. A loan is considered impaired when management determines that it is probable that the full amounts due will not be collected according to the original contractual terms. When a loan has been identified as impaired, the carrying amount of the loan is reduced, by recording specific provisions for credit losses, to its estimated recoverable amount, which is the present value of expected future cash flows including amounts recoverable from guarantees and collateral, discounted at the original effective interest rate of the loan.

The provision for credit losses also covers situations where there is objective evidence that probable losses are present in components of the loan portfolio at the statement of financial position date. These have been estimated based upon historical patterns of losses in each component, the credit ratings allocated to the borrowers and reflecting the current economic climate in which the borrowers operate.

For non-performing and impaired loans the accrual of interest income based on the original terms of the loan is discontinued. The Bank of Jamaica regulations require that interest on non-performing bank loans be taken into account on the cash basis. IFRS requires the increase in the present value of impaired loans due to the passage of time to be reported as interest income. The difference between the Jamaican regulatory basis and IFRS was assessed to be immaterial.

Write-offs are made when all or part of a toan is deemed uncollectible or in the case of debt forgiveness. Write-offs are charged against previously established provisions for credit losses and reduce the principal amount of a loan. Recoveries in part or in full of amounts previously written-off are credited to credit loss expense in the income statement.

Statutory and other regulatory loan loss reserve requirements that exceed IFRS provisions which are charged to the income statement are dealt with in a non-distributable loan loss reserve as an appropriation of retained earnings.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in investment securities on the statement of financial position.

Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss are initially recognised at fair value, and transaction costs are expensed in the income statement. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value through profit or loss are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

Significant Accounting Policies (Continued)

(h) Financial assets (continued)

Changes in the fair value of monetary securities denominated in a foreign currency and classified as available-for-sale are analysed between translation differences resulting from changes in amortised cost of the security and other changes in the carrying amount of the security. The translation differences on monetary securities are recognised in profit or loss; translation differences on non-monetary securities are recognised in other comprehensive income.

Changes in the fair value of monetary and non-monetary securities classified as available for sale are recognised in other comprehensive income. When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments previously recognised in other comprehensive income are included in the income statement as gains and losses from investment securities.

Interest on available-for-sale securities calculated using the effective interest method is recognised in the income statement as part of revenue, other income and finance income. Dividends on available-for-sale equity instruments are recognised in the income statement as part of other income when the Group's right to receive payments is established.

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models, making maximum use of market inputs and relying as little as possible on entity-specific inputs.

The Group assesses at each statement of financial position date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of a security below its cost is considered as an indicator that the security is impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from other comprehensive income and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement.

(i) Derivative financial instruments

Derivatives are financial instruments that derive their value from the price of the underlying items such as equities, bonds, interest rates, foreign exchange, credit spreads, commodities or other indices. Derivatives enable users to increase, reduce or alter exposure to credit or market risk. The Group transacts derivatives to manage its own exposure to foreign exchange risk and interest rate risk.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value at each statement of financial position date. Fair values are obtained from quoted market prices, discounted cash flow models and option pricing models as appropriate. Derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative. Assets and liabilities are set off where the contracts are with the same counterparty, a legal right of set off exists and the cash flows are intended to be settled on a net basis.

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the contracts are not measured at fair value through profit or loss.

Gains and losses from the changes in the fair value of derivatives are included in the income statement.

(j) Investments in subsidiaries

Investments in subsidiaries are stated at cost.

(k) Impairment of non-financial assets

Fixed assets and other assets, excluding goodwill, are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of an asset's net selling price and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows.

(I) Income taxes

Taxation expense in the income statement comprises current and deferred tax charges.

Current tax charges are based on taxable profit for the year, which differs from the profit before tax reported because it excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Group's liability for current tax is calculated at tax rates that have been enacted or substantively enacted at statement of financial position date in the countries where the company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(i) income taxes (continued)

Deferred tax is the tax expected to be paid or recovered on differences between the carrying amounts of assets and liabilities and the corresponding tax bases. Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted or substantively enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is charged or credited in the income statement, except where it relates to items charged or credited to other comprehensive income or equity, in which case, deferred tax is also dealt with in other comprehensive income or equity.

(m) Employee benefits

Pension obligations

The Group participates in a defined contribution plan whereby it pays contributions to a privately administered fund. Once the contributions have been paid, the Group has no further payment obligations. The regular contributions constitute net periodic costs for the year in which they are due and are included in staff costs.

Pension plan assets

The Group also operates a defined benefit plan. The scheme is generally funded through payments to a trustee-administered fund as determined by periodic actuarial calculations. A defined benefit plan is a pension plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors such as age, years of service or compensation.

The asset or liability in respect of defined benefit pension plans is the difference between the present value of the defined benefit obligation at the statement of financial position date and the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by the estimated future cash outflows using interest rates of Government securities which have terms to maturity approximating the terms of the related liability.

Actuarial gains and losses arising from experience adjustments, changes in actuarial assumptions and amendments to pension plans are charged or credited to equity in other comprehensive income in the period in which they arise.

Past-service costs are recognised immediately in income.

For defined contribution plans, the Group pays contributions to privately administered pension plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Other post-employment obligations

Some Group companies provide post-employment health care benefits, group life, gratuity and supplementary plans for their retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment, using an accounting methodology similar to that for defined benefit pension plans. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. These obligations are valued annually by independent qualified actuaries.

Equity compensation benefits

The Group operates equity-settled, share-based compensation plans. Directors, senior executives, management and key employees are awarded stock options and/or restricted stock grants. The fair value of the employee services received in exchange for the grant of the options or restricted units is recognised as an expense. The total amount expensed over the vesting period is determined by reference to the fair value of the options or restricted units granted, excluding the impact of non-market vesting conditions. When options are exercised or restricted units are vested, the proceeds received net of any transaction costs or the value transferred are credited to share capital.

Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group recognises termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after statement of financial position date are discounted to present value.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(m) Employee benefits (continued)

Incentive plans

The Group recognises a liability and an expense for bonuses, based on a formula that takes into consideration the profit attributable to the company's owners after certain adjustments. The Group recognises a provision where contractually obliged or where there is past practice that has created a constructive obligation.

(n) Inventories

Inventories are stated at the lower of average cost and net realisable value. In the case of the company, cost represents invoiced cost plus direct inventory-related expenses. For the subsidiaries, costs are determined by methods and bases appropriate to their operations. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads. Net realisable value is the estimate of the selling price in the ordinary course of business, less the costs of completion and selling expenses.

(o) Trade and insurance receivables

Trade and insurance receivables are carried at original invoice amount (which represents fair value) less provision made for impairment of these receivables. A provision for impairment of these receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against selling and marketing costs in the income statement. Impairment testing of trade receivables is described in Note 3.

(p) Cash and cash equivalents

Cash and cash equivalents are carried on the statement of financial position at cost. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are included within bank and other loans on the statement of financial position.

(q) Payables

Payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Payables are initially recognised at fair value and subsequently stated at amortised cost.

(r) Insurance business provisions

Claims outstanding

Provision is made to cover the estimated cost of settling claims arising out of events which have occurred by the statement of financial position date, including claims incurred but not reported, less amounts already paid in respect of these claims. Provision for reported claims is based on individual case estimates.

Insurance reserves

Provision is made for that proportion of premiums written in respect of risks to be borne subsequent to the year end under contracts of insurance entered into on or before the statement of financial position date. Provision is also made to cover the estimated amounts in excess of unearned premiums required to meet future claims and expenses on business in force.

Reinsurance ceded

The insurance subsidiary cedes insurance premiums and risk in the normal course of business in order to limit the potential for losses arising from longer exposures. Reinsurance does not relieve the originating insurer of its liability. Reinsurance assets include the balances due from both insurance and reinsurance companies for paid and unpaid losses and toss adjustment expenses and ceded unearned premiums. Amounts recoverable from reinsurers are estimated in a manner consistent with the claim liability associated with the reinsured policy. Reinsurance is recorded gross in the statement of financial position unless the right of offset exists.

Deferred policy acquisition costs

The costs of acquiring and renewing insurance contracts, including commissions, underwriting and policy issue expenses, which vary with and are directly related to the contracts, are deferred over the unexpired period of risk carried. Deferred policy acquisition costs are subject to recoverability testing at the time of policy issue and at the end of each accounting period.

Notes to the Financial Statements

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(s) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where the Group expects a provision to be reimbursed; for example, under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

(t) Deposits

Deposits are recognised initially at the nominal amount when funds are received. Deposits are subsequently stated at amortised cost using the effective yield method.

(u) Securities purchased/sold under resale/repurchase agreements

The purchase and sale of securities under resale and repurchase agreements are treated as collateralised lending and borrowing transactions. The related interest income and expense are recorded on the accrual basis.

(v) Borrowings

Bank toans and overdrafts are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Preference shares, which are mandatorily redeemable on a specific date, are classified as liabilities. The dividends on these preference shares are recognised in the income statement as interest expense.

(w) Borrowings costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

(x) Leases

As lessee

Leases of fixed assets where the Group assumes substantially all the benefits and risks of ownership are classified as finance leases. Finance leases are capitalised at the estimated present value of the underlying lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in finance lease obligations. The interest element of the finance charge is charged to the income statement over the lease period. The fixed asset acquired under finance leasing contracts is depreciated over the useful life of the asset.

Leases of assets under which all the risks and benefits of ownership are effectively retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the income statement on a straight-line basis over the period of the lease.

When an operating lease is terminated before the lease period has expired, any payment required to be made to the lessor by way of penalty is recognised as an expense in the period in which termination takes place.

As lessor

When assets are sold under a finance tease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearmed income. Lease income is recognised over the term of the lease so as to reflect a constant periodic rate of return.

(y) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Where any Group company purchases the company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs (net of income taxes), is deducted from equity attributable to the company's owners until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received (net of any directly attributable incremental transaction costs and the related income tax effects) is included in equity attributable to the company's owners.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(z) Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of the Group's activities. Revenue is shown net of General Consumption Tax or applicable sales tax, returns, rebates and discounts and after eliminating sales within the Group.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Group's activities as described below. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(i) Sales of goods - wholesale

The Group manufactures and sells a range of general and food items in the wholesale market. Sales of goods are recognised when a Group entity has delivered products to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery does not occur until the products have been shipped to the specified location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, the acceptance provisions have lapsed or the Group has objective evidence that all criteria for acceptance have been satisfied. The general and food items are often sold with volume discounts; customers have a right to return faulty products in the wholesale market. Sales are recorded based on the price specified in the sales contracts, net of the estimated volume discounts and returns at the time of sale. Accumulated experience is used to estimate and provide for the discounts and returns. The volume discounts are assessed based on anticipated annual purchases. No element of financing is deemed present as the sales are made with a credit term of up to 90 days, which is consistent with the market practice.

(ii) Sales of goods - retail

The Group operates a chain of retail outlets for selling general and food items, hardware and agro products. Sales of goods are recognised when a Group entity sells a product to the customer. Retail sales are usually in cash or by credit. It is the Group's policy to sell its products to the retail customer with a right to return within 30 days. Accumulated experience is used to estimate and provide for such returns at the time of sale. The Group operates a loyalty programme in which the parent company has contracted certain subsidiaries to participate in the programme in the capacity of an issuer and/or redeemer of loyalty points. Under this programme, customers accumulate points for purchases made at certain subsidiaries within the Group, which entitle them to goods and services at redeeming subsidiaries and/or third party suppliers. Commission is recognised by the participating subsidiaries in their capacity as agents at the point the parent company is obligated to supply the awards and is entitled to receive consideration for doing so, that is, when points are issued. Revenue is recognised on a gross basis by the parent company in the capacity of principal at the point at which the company has fulfilled its obligations in respect of the awards, that is when points are issued. Amounts payable to participating subsidiaries and third parties for acting as suppliers in the programme are recognised by the parent company as an expense. One of the Group's subsidiaries operates a loyalty programme under similar arrangements to that of the parent company.

(iii) Sales of services

The Group sells insurance and financial services to the general public. These services are provided on a time and fixed-price contract, with contract terms generally ranging from less than one year to three years. Revenue is generally recognised at the contractual rates. Revenue is generally recognised based on the services performed to date as a percentage of the total services to be performed. If circumstances arise that may change the original estimates of revenues, costs or extent of progress toward completion, estimates are revised. These revisions may result in increases or decreases in estimated revenues or costs and are reflected in income in the period in which the circumstances that give rise to the revision become known by management. Fees and commission income are generally recognised on an accrual basis when the service has been provided. Loan origination fees for loans which are likely to be drawn down are deferred, together with related direct costs, and recognised as an adjustment to the effective interest on the loan. Fees and commissions arising from negotiating or participating in the negotiation of a transaction for a third party are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time-apportionate basis. Asset management fees related to investment funds are recognised rateably over the period in which the service is provided. Performance linked fees or fee components are recognised when the performance criteria are fulfilled.

(iv) Interest income

Interest income is recognised using the effective interest method. When a loan and receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables is recognised using the original effective interest rate.

(v) Dividend income

Dividend income is recognised when the right to receive payment is established.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

2. Significant Accounting Policies (Continued)

(aa) Dividends

Dividends are recorded as a deduction from equity in the period in which they are approved.

(ab) Investment properties

Investment properties, principally comprising land and buildings, are held for long-term rental yields and capital appreciation and are treated as long-term investments. They are measured initially at cost, including related transaction costs and are subsequently carried at fair value.

Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in light of current market conditions. The fair value also reflects, on a similar basis, any cash outflows that could be expected in respect of the property.

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to income during the financial period in which they are incurred. Fair value gains or losses are recorded in income.

(ac) Discontinued operations

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single coordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the income statement.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management

The Group's activities expose it to a variety of insurance and financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

The Board of Directors is ultimately responsible for the establishment and oversight of the Group's risk management framework. It provides policies for overall risk management, as well as principles and procedures covering the specific areas of risk. The Board has established committees/departments for managing and monitoring risks, such as foreign exchange risk, interest rate risk, credit risk and liquidity risk, as follows:

(i) Audit Committee

The Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Audit Committee is assisted in its oversight role by Group Risk Management and Internal Audit. Group Risk Management establishes a framework within which the opportunities and risks affecting the Group may be measured, assessed, and effectively controlled. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(ii) Corporate Governance Committee

The Corporate Governance Committee assists the Board in enhancing the Group's system of corporate governance by establishing, monitoring and reviewing the principles of good governance with which the Group and its directors will comply. The Committee promotes high standards of corporate governance based on the principles of openness, integrity and accountability taking into account the Group's existing legal and regulatory requirements. It establishes such procedures, policies and codes of conduct to meet these aims as it considers appropriate. Qualified individuals are identified and recommended by the Board to become members. It also leads the Board of Directors in its annual review of the Board's performance.

(iii) Asset and Liability Committees/Investment Committees

The Asset and Liability Committees (ALCOs) and Investment Committees are management committees responsible for monitoring and formulating investment portfolios and investment strategies within the Insurance, Banking and Investment, and Corporate divisions. The ALCOs are also responsible for monitoring adherence to trading limits, policies and procedures that are established to ensure that there is adequate liquidity as well as monitoring and measuring capital adequacy for regulatory and business requirements. To discharge these responsibilities, the ALCOs establish asset and liability pricing policies to protect the liquidity structure as well as assesses the probability of various liquidity shocks and interest rate scenarios. They also establish and monitor relevant liquidity ratios and statement of financial position targets. Overall, the Committees ensure compliance with the policies related to the management of liquidity risk, interest rate risk, and foreign exchange risk.

(iv) Corporate Finance Department

The Corporate Finance Department is responsible for managing the Group's assets and ilabilities and the overall capital structure. It is also primarily responsible for the funding and liquidity risks of the Group. Corporate Finance identifies, evaluates and manages financial risks in close co-operation with the Group's operating business units.

The most important types of risk are Insurance risk, reinsurance risk, credit risk, liquidity risk, market risk and other operational risk. Market risk includes currency risk, interest rate and other price risk.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

a) Insurance risk

The Group issues contracts that transfer insurance risk. This section summarises the risk and the way it is managed by the Group.

Insurance risk for the Group attributable to policies sold by its general insurance underwriting subsidiaries, is borne by those subsidiaries. The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore, unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claim payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits is greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that increase insurance risk include lack of risk diversification in terms of type and amount of risk and geographical location.

Management maintains an appropriate balance between commercial and personal policies and type of policies based on guidelines set by the Board of Directors. Insurance risk arising from the Group's Insurance contracts is, however, concentrated within Jamaica.

The Group has the right to re-price the risk on renewal. It also has the ability to impose deductibles and reject fraudulent claims. Where applicable, contracts are underwritten by reference to the commercial replacement value of the properties or other assets and contents insured. Claims payment limits are always included to cap the amount payable on occurrence of the insured event. Cost of rebuilding properties, of replacement or indemnity for other assets and contents and time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies.

Management sets policy and retention limits based on guidelines set by the Board of Directors of the subsidiaries. The policy limit and maximum net retention of any one risk for each class of insurance per customer for the year are as follows:

	20	16	2015		
	Policy Limit	Maximum Net Retention	Policy Limit	Maximum Net Retention	
	\$'000	\$'000	\$'000	\$'000	
Commercial property:	· · · · · · · · · · · · · · · · · · ·

Insurance and Financial Risk Management (Continued)

(a) Insurance risk (continued)

Sensitivity Analysis of Actuarial Liabilities

The determination of actuarial liabilities is sensitive to a number of assumptions, and changes in those assumptions could have a significant effect on the valuation results. These factors are discussed below.

Actuarial Assumptions

- (i) In applying the noted methodologies, the following assumptions were made:
 - Claims inflation has remained relatively constant and there have been no material legislative changes in the Jamaican civil
 justice system that would cause claim inflation to increase dramatically.
 - · There is no latent environmental or asbestos exposure embedded in the loss history.
 - The case reserving and claim payments rates have and will remain relatively constant.
 - The overall development of claims costs gross of reinsurance is not materially different from the development of claims costs net of reinsurance. This assumption is supported by:
 - The majority of the reinsurance program consists of proportional reinsurance agreements.
 - The non-proportional reinsurance agreements consist primarily of high attachment points.
 - Claims are expressed at their estimated ultimate undiscounted value, in accordance with the requirement of the insurance regulations.

(ii) Provision for adverse deviation assumptions

The basic assumptions made in establishing insurance reserves are best estimates for a range of possible outcomes. To recognise the uncertainty in establishing these best estimates, to allow for possible deterioration in experience and to provide greater comfort that the reserves are adequate to pay future benefits, the appointed actuary is required to include a margin for adverse deviation in each assumption.

Reserves have been calculated on an undiscounted basis as well as on a discounted basis with a risk load added in. Where the undiscounted reserve was larger than the discounted reserve including the calculated provision for adverse deviation, the undiscounted amount was chosen. This assumes that holding reserves at an undiscounted amount includes an implicit risk load.

(iii) Scenario testing

The two major assumptions that determine reserve levels are:

- The selection of a-priori loss ratios within the Bornhuetter-Ferguson methods (Note 4).
- The selection of loss development factors.

These factors have been stochatistically modeled using various confidence intervals to determine the Impact on the net reserves. The net reserves of \$2,763,198,000 were determined at the 50% confidence interval. Had the confidence interval increased/(decrease) by 10%, the net reserves would increase/(decrease) by \$100,919,000/(\$101,141,000).

Development Claim Liabilities

In addition to sensitivity analysis, the development of insurance liabilities provides a measure of the Group's ability to estimate the ultimate value of claims. The table below illustrates how the Group's estimate of the ultimate claims liability for accident years 2007 - 2015 has changed at successive year-ends, up to 2016. Updated unpaid claims and adjustment expenses (UCAE) and claims incurred but not reported (IBNR) estimates in each successive year, as well as amounts paid to date are used to derive the revised amounts for the ultimate claims liability for each accident year, used in the development calculations.

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

(b) Reinsurance risk

To limit its exposure to potential loss on an insurance policy, the insurer may cede certain levels of risk to a reinsurer. The Group selects reinsurers which have established capability to meet their contractual obligations and which generally have high credit ratings. The credit ratings of reinsurers are monitored.

Retention limits represent the level of risk retained by the insurer. Coverage in excess of these limits is ceded to reinsurers up to the treaty limit. The retention programmes used by the Group are summarised below:

- The retention limit or maximum exposure on insurance policies under the reinsurance treaties range between \$3,838,000 and \$38,382,000 (2015: \$3,601,000 and \$36,009,000).
- b) The Group utilises reinsurance treatles to reduce its net retained risk. The risk is spread over several reinsurers all of whom are AM Best or S&P rated at A or better.
- Excess of loss reinsurance is also purchased to cover the retained risk in the event of a catastrophe as well as for large motor losses.
- d) The amount of reinsurance recoveries recognised during the period is as follows:

	Group	Group		
	2016	2015		
<u> </u>	\$'000	\$'000		
Property	715,955	126,254		
Motor	29,903	37,391		
Marine	3,281	4,975		
Liability	18,419	(1,218)		
Pecuniary loss	(2,588)	(75)		
Accident	1,458	118		
	766,428	167,445		

(c) Financiał risk

The Group is exposed to financial risk through its financial assets, reinsurance assets and insurance liabilities. The most important components of this financial risk are credit risk, cash flow risk and market risk (interest rate risk and currency risk).

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risks that the Group primarily faces due to the nature of its investments and liabilities are interest rate risk and currency risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

(i) Credit risk

The Group takes on exposure to credit risk, which is the risk that its customers, clients or counterparties will cause a financial loss for the Group by failing to discharge their contractual obligations. Credit exposures arise principally from the Group's receivables from customers, principals, agents, the amounts due from reinsurers, amounts due from insurance contract holders and insurance brokers, lending and investment activities. There is also credit risk in off-statement of financial position financial instruments, such as loan commitments. The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single counterparty or groups of related counterparties and to geographical and industry segments.

Credit-related commitment risks arise from guarantees which may require payment on behalf of customers. Such payments are collected from customers based on the terms of the letters of credit. They expose the Group to similar risks to loans and these are mitigated by the same control policies and processes.

Credit risk arising from derivative financial instruments is, at any time, limited to those with positive fair values, as recorded in the statement of financial position.

(c) Financial risk (continued)

(i) Credit risk (continued)

Credit review process

The Group has established a credit quality review process and has credit policies and procedures which require regular analysis of the ability of borrowers and other counterparties to meet interest, capital and other repayment obligations.

(a) Trade and other receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The credit policy states that each customer must be analysed individually for creditworthiness prior to the Group offering them a credit facility. Customers may be required to provide a banker's guarantee and credit limits are assigned to each customer. These limits are reviewed at least twice per year. The Group has procedures in place to restrict customer orders if the order will exceed their credit limits. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group on a prepayment basis.

Customer credit risks are monitored according to credit characteristics such as whether it is an individual or company, geographic location, industry, ageing profile, and previous financial difficulties. Special negotiated arrangements may extend the credit period to a maximum of 3 months. Trade and other receivables relate mainly to the Group's retail and direct customers.

The Group establishes an allowance for impairment that represents its estimate of incurred losses in respect of trade and other receivables. The Group addresses impairment assessment in two areas: individually assessed allowances and collectively assessed allowances.

The Group's average credit period for the sale of goods is 1 month. The Group has provided fully for all receivables over 6 months based on historical experience which dictates that amounts past due beyond 6 months are generally not recoverable. Trade receivables between 3 and 6 months are provided for based on an estimate of amounts that would be irrecoverable, determined by taking into consideration past default experience, current economic conditions and expected receipts and recoveries once impaired.

(b) Loans and leases

The Group assesses the probability of default of individual counterparties using internal ratings. Customers of the Group are segmented into three rating classes. The Group's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class.

Group's internal rating scale:

Group's rating	Description of the grade	
1	Low risk	- Excellent credit history
2	Standard risk	- Generally abides by credit terms
3	Sub-Standard	- Late paying with some level of impairment

Exposure to credit risk is managed in part by obtaining collateral and corporate and personal guarantees. Counterparty limits are established by the use of a credit classification system, which assigns each counterparty a risk rating. Risk ratings are subject to regular revision. The credit quality review process allows the Group to assess the potential loss as a result of the risk to which it is exposed and take corrective action.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

Insurance and Financial Risk Management (Continued)

(c) Financial risk (continued)

(i) Credit risk (continued)

(c) Reinsurance

Reinsurance is used to manage insurance risk. This does not, however, discharge the Group's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Group remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract. The insurance subsidiaries' Risk and Reinsurance Department assesses the creditworthiness of all reinsurers and intermediaries by reviewing credit grades provided by rating agencies and other publicly available financial information.

(d) Premium and other receivables

The respective credit committees within the Group examine the payment history of significant contract holders with whom they conduct regular business. Management information reported to the Group includes details of provisions for impairment on loans and receivables and subsequent write-offs. Internal Audit makes regular reviews to assess the degree of compliance with the Group procedures on credit. Exposures to individual policyholders and groups of policyholders are collected within the ongoing monitoring of the controls associated with regulatory solvency. Where there exists significant exposure to individual policyholders, or homogenous groups of policyholders, a financial analysis is carried out by the insurance subsidiaries' Risk and Reinsurance Department.

(e) Investments

The Group limits its exposure to credit risk by investing mainly in liquid securities, with counterparties that have high credit quality. Accordingly, management does not expect any counterparty to fail to meet its obligations.

Collateral and other credit enhancements

The amount and type of collateral required depend on an assessment of the credit risk of the counterparty. Guidelines are implemented regarding the acceptability of different types of collateral.

The main types of collateral obtained are as follows:

Loans and leases - mortgages over residential and commercial properties, charges over business assets such as premises, equipment, inventory and accounts receivable and charges and hypothecations over deposit balances and financial instruments such as debt securities and equities.

Securities lending and reverse repurchase transactions – cash or securities.

The Group also obtains guarantees from parent companies for loans to their subsidiaries and from individual owners for loans to their companies.

Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreement, and monitors the market value of collateral held during its annual reviews of individual credit facilities as well as during its review of the adequacy of the provision for credit losses.

Impairment

The main considerations for the loan impairment assessment include whether any payments of principal or interest are overdue by more than 3 months or there are any known difficulties in the cash flows of counterparties, credit rating downgrades, infringement of the original terms of the contract, or impairment of collateral.

The Group addresses impairment assessment in two areas: individually assessed allowances and collectively assessed allowances.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

- Insurance and Financial Risk Management (Continued)
 - (c) Financial risk (continued)
 - (i) Credit risk (continued)

Impairment (continued)

Individually assessed allowances are provided for financial assets that are above materiality thresholds based on a review conducted at least annually, or more regularly, when individual circumstances require. Impairment allowances on individually assessed accounts are determined by an evaluation of the incurred loss at statement of financial position date on a case-by-case basis, and are applied to all individually significant accounts. The assessment normally encompasses collateral held and the anticipated receipts for that individual account.

Collectively assessed allowances are provided for: (i) portfolios of homogenous assets that are individually below materiality thresholds; and (ii) losses that have been incurred but have not yet been identified, by taking into consideration historical losses on the portfolio, current economic conditions and expected receipts and recoveries once impaired.

The internal rating systems described above focus more on credit-quality mapping from the inception of lending activities. In contrast, impairment provisions are recognised for financial reporting purposes only for losses that have been incurred at the statement of financial position date based on objective evidence of impairment. Due to the different methodologies applied, the amount of incurred credit losses provided for in the financial statements is usually lower than the amount determined from the expected loss model that is used for internal operational management and banking regulation purposes.

The internal rating tool assists management to determine whether objective evidence of impairment exists under IAS 39, based on the following criteria set out by the Group:

- · Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower (e.g. equity ratio, net income percentage of sales);
- Breach of loan covenants or conditions;
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position; and
- Deterioration in the value of collateral.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

(c) Financial risk (continued)

(i) Credit risk (continued)

The impairment provision shown in the statement of financial position at year-end is derived from each of the three internal rating grades. However, the impairment provision comes from the last rating class (sub-standard). The tables below show the Group's and company's loans, leases, premium and trade receivables and the associated impairment provision for each internal rating class:

Group's rating

	2016		2015	
	Loans, Leases, Premium and Trade Receivables \$'000	Impairment Provision \$'000	Loans, Leases, Premium and Trade Receivables \$'000	Impairment Provision \$'000
Low risk	37,663	-	90,499	
Standard risk	36,460,525	-	31,042,647	
Sub-Standard	1,942,934	1,002,470	1,798,951	715,579
	38,441,122	1,002,470	32,932,097	715,579

Company's rating

	2010	2010		
	Loans, Leases, Premium and Trade Receivables \$'000	Impairment Provision \$'000	Trade Receivables	Impairment Provision \$'000
Standard risk	4,351,693	•	4,359,059	•
Sub-Standard	172,236	100,448	137,529	97,981
	4,523,929	100,448	4,496,588	97,981

2046

Maximum exposure to credit risk before collateral held or other credit enhancements

The maximum exposure to credit risk at the reporting date is the carrying value of the financial assets as reported in the statement of financial position.

This represents a worst case scenario of credit risk exposure to the Group and company at 31 December 2016 and 2015, without taking account of any collateral held or other credit enhancements.

Notes to the Financial Statements

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

- (c) Financial risk (continued)
 - (i) Credit Risk (continue)

Loans and leases, premium and trade receivables

Credit quality of loans and leases, premium, trade and other receivables are summarised as follows:

	Grou	р	Company		
	2016	2015	2016	2015	
	\$'000	\$'000	\$'000	\$'000	
Neither past due nor impaired -	<u> </u>				
Low risk	37,663	90,499		-	
Standard risk	33,561,765	28,343,505	4,192,639	4,204,355	
-	33,599,428	28,434,004	4,192,639	4,204,355	
Past due but not impaired	2,898,760	2,699,142	159,054	154,704	
Impaired	1,942,934	1,798,951	172,236	137,529	
Gross	38,441,122	32,932,097	4,523,929	4,496,588	
Less: provision for credit losses	(1,002,470)	(715,579)	(100,448)	(97,981)	
Net	37,438,652	32,216,518	4,423,481	4,398,607	

Ageing analysis of loans and leases, premium and trade receivables that are past due but not impaired:

Loans and leases, premium and trade receivables that are less than 3 months past due are not considered impaired. As of 31 December 2016, loans and leases, premium and trade receivables of \$2,898,760,000 (2015: \$2,699,142,000) and \$159,054,000 (2015: \$154,704,000) for the Group and company respectively were past due but not impaired. These relate to a number of independent customers for whom there is no recent history of default. The ageing analysis of these loans and leases, premium and trade receivables is as follows:

	Grou	Company		
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000
Less than 1 month	1,420,277	1,389,665		-
Within 1 to 3 months	1,002,915	1,019,643	145,587	137,150
Over 3 months	475,568	289,834	13,467	17,554
	2,898,760	2,699,142	159,054	154,704

As of 31 December 2016, loans and leases, premium and trade receivables of \$1,942,934,000 (2015: \$1,798,951,000) and \$172,236,000 (2015: \$137,529,000) for the Group and company respectively were impaired. The amount of the provision was \$1,002,470,000 (2015: \$715,579,000) and \$100,448,000 (2015: \$97,981,000) for the Group and company respectively. There are no financial assets other than loans, leases, premium and trade receivables that are past due.

Notes to the Financial Statements

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

c) Financial risk (continued)

(i) Credit risk (continued)

The individually impaired receivables mainly relate to wholesalers who are in unexpected difficult economic situations. It was assessed that a portion of the receivables is expected to be recovered.

The ageing of the impaired loans and lease receivables is as follows:

	Grou	Company		
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000
Over 6 months	1,457,568	1,321,513	•	•
	1,457,568	1,321,513	•	

Movements on the provision for impairment of loans and leases are as follows:

	Group		Company		
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000	
At 1 January	377,325	247,763	-	-	
Provision for receivables impairment	325,311	228,502		-	
Receivables written off during the year as uncollectible	(113,732)	(98,940)	-		
At 31 December	588,904	377,325	•	-	

The ageing of the impaired premium and trade receivables is as follows:

	Group	Company		
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000
3 to 6 months	148,103	192,988	56,284	28,351
Over 6 months	337,263	284,450	115,952	109,178
	485,366	477,438	172,236	137,529

Movements on the provision for impairment of premium and trade receivables are as follows:

	Group	ı	Company		
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000	
At 1 January	338,254	357,023	97,981	108,119	
Provision for receivables impairment	177,865	175,394	24,033	31,160	
Receivables written off during the year as uncollectible	(77,363)	(88,617)	(11,575)	(25,581)	
Unused amounts reversed	(25,190)	(105,546)	(9,991)	(15,717)	
At 31 December	413,566	338,254	100,448	97,981	

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

3. Insurance and Financial Risk Management (Continued)

- (c) Financial risk (continued)
 - (i) Credit risk (continued)

The overall ageing of the impaired loans and leases, premium and trade receivables is as follows:

	Grou	Group		Company	
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000	
3 to 6 months	148,103	192,988	56,284	28,351	
Over 6 months	1,794,831	1,605,963	115,952	109,178	
	1,942,934	1,798,951	172,236	137,529	

Movements on the provision for impairment of loans and leases, premium and trade receivables are as follows:

	Group		Company	
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000
At 1 January	715,579	604,786	97,981	108,119
Provision for receivables impairment	503,176	403,896	24,033	31,160
Receivables written off during the year as uncollectible	(191,095)	(187,557)	(11,575)	(25,581)
Unused amounts reversed	(25,190)	(105,546)	(9,991)	(15,717)
At 31 December	1,002,470	715,579	100,448	97,981

The creation and release of provisions for impaired receivables have been included in expenses in the income statement. Amounts charged to the allowance account are generally written off when there is no expectation of recovering additional cash.

There are no financial assets other than those listed above that were individually impaired.

Financial assets - Individually impaired

Financial assets that are individually impaired before taking into consideration the cash flows from collateral held are as follows:

	Group		Company		
	2016	2015	2016	2015	
<u> </u>	\$'000	\$'000	\$'000	\$'000	
Loans and leases	1,457,568	1,321,513	•	_	
Trade and other receivables	485,366	477,438	172,236	137,529	

There are no financial assets other than those listed above that were individually impaired.

Repossessed collateral

The Group and the company obtained assets by taking possession of collateral held as security. Repossessed collateral is sold as soon as practicable with the proceeds used to reduce the outstanding indebtedness.

A number of cases are in the courts awaiting judgments. The impairment provision has not been adjusted for these claims.

Debt securities

The following table summarises the Group's and company's credit exposure for debt securities at their carrying amounts, as categorised by issuer:

	Grou	P	Company		
	2016	2015	2016	2015	
	\$'000	\$'000	\$'000	\$'000	
Government of Jamaica:				-

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

Insurance and Financial Risk Management (Continued)

(c) Financial risk (continued)

(ii) Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to repay depositors and fulfil commitments to lend.

Liquidity risk management process

The Group's liquidity management process, as carried out within the Group through the ALCOs and treasury departments, includes:

- (i) Monitoring future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure funding if required.
- (ii) Maintaining a portfolio of highly marketable and diverse assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- (iii) Maintaining committed lines of credit;
- (iv) Optimising cash returns on investment;
- (v) Monitoring statement of financial position liquidity ratios against internal and regulatory requirements. The most important of these is to maintain limits on the ratio of net liquid assets to customer liabilities;
- (vi) Managing the concentration and profile of debt maturities.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month, respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities are fundamental to the management of the Group. It is unusual for companies ever to be completely matched since business transacted is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but can also increase the risk of loss.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Notes to the Financial Statements

The assets available to meet all of the liabilities and to cover outstanding loan commitments include: cash, Central Bank balances, items in the course of collection, investment securities and other eligible bills, loans and advances to banks, and loans and advances to customers. In the normal course of business, a proportion of customer loans contractually repayable within one year will be extended. In addition, debt securities and treasury and other bills have been pledged to secure liabilities. The Group is also able to meet unexpected net cash outflows by selling securities and accessing additional funding sources from other financing institutions. The Group and the company have the following undrawn committed borrowing facilities:

	Grou	р	Compa	iny
	2016 \$'000	2015 \$'000	2016 \$'000	2015 \$'000
Floating rate – Expiring within one year	9,075,887	9,771,165	6,371,215	7,145,559

The facilities expiring within one year are annual facilities subject to review at various dates during the subsequent year. The other facilities have been arranged to help finance the Group's activities.

(ili) Market risk

The Group takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks mainly arise from changes in foreign currency exchange rates and interest rates. Market risk is monitored by the research and treasury departments which carry out extensive research and monitor the price movement of financial assets on the local and international markets. Market risk exposures are measured using sensitivity analysis.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar, the Canadian dollar, UK pound and the Euro.

Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations.

The Group manages its foreign exchange risk by ensuring that the net exposure in foreign assets and liabilities is kept to an acceptable level by monitoring currency positions. The Group further manages this risk by maximising foreign currency earnings and holding foreign currency balances.

The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency translation risk. Currency exposure arising from the net assets of the Group's foreign operations is managed primarily through borrowings denominated in the relevant foreign currencles.

Foreign currency sensitivity

The following tables indicate the currencies to which the Group and company had significant exposure on its monetary assets and liabilities and its forecast cash flows. The change in currency rates below represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis represents the changes in carrying amounts of outstanding foreign currency denominated monetary items and adjusts their translation at the year-end for a 6% increase (2015: 8%) and a 1% decrease (2015: 1%) in foreign currency rates to arrive at the corresponding impact on profit. The sensitivity analysis includes cash and deposits, investment securities, receivables, loans receivable, deposits, securities sold under agreements to repurchase, bank and other loans, and payables. The correlation of variables will have a significant effect in determining the ultimate impact on market risk, but to demonstrate the impact due to changes in variables, variables had to be assessed on an individual basis.

Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Floating rate instruments expose the Group to cash flow interest risk, whereas fixed rate instruments expose the Group to fair value interest risk.

The Group manages interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments and also manages the maturities of interest bearing financial assets and liabilities. The respective boards within the Group set limits on the level of mismatch of interest rate repricing that may be undertaken, which is monitored by the ALCOs and Investment Committees.

The following tables summarise the Group's and the company's exposure to interest rate risk. It includes the Group and company financial instruments at carrying amounts, categorised by the earlier of contractual repricing or maturity dates.

(c) Financial risk (continued)

(iii) Market risk (continued)

Interest rate risk (continued)

Interest rate sensitivity

The following table indicates the sensitivity to a reasonable possible change in interest rates, with all other variables held constant, on the Group's and company's income statement and equity.

The Group's interest rate risk arises from investment securities, loans receivable, customers' deposits, securities sold under repurchase agreements and borrowings. The sensitivity of the profit or loss is the effect of the assumed changes in interest rates on net income based on floating rate financial assets and floating rate liabilities. The sensitivity of equity is calculated by revaluing fixed rate available-for-sale financial assets for the effects of the assumed changes in interest rates combined with the effect on net profit. The correlation of variables will have a significant effect in determining the ultimate impact on market risk, but to demonstrate the impact, each variable has to be evaluated on an individual basis.

Price Risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Group is exposed to equity price risk because of equity investments held and classified on the statement of financial position as either available for sale or at fair value through profit or loss. The Group manages its price risk by trading these instruments when appropriate to reduce the impact of any adverse price fluctuations.

The impact of a 10% (2015: 20%) change in the quoted prices for these equities would be an increase or decrease in the carrying value of \$1,230,000 (2015: \$1,000,000) in income and \$35,329,000 (2015: \$66,739,000) in other comprehensive income.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

Insurance and Financial Risk Management (Continued)

(d) Capital management

Insurance subsidiaries

The insurance subsidiaries' objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- (i) To comply with the capital requirements set by the regulators of the insurance markets within which the companies operate;
- (ii) To safeguard their ability to continue as going concerns so that they can continue to provide returns for stockholders and benefits for other stakeholders; and
- (iii) To maintain a strong capital base to support the development of business.

Capital adequacy is managed and monitored at the insurance subsidiaries' level by management, the Audit Committee and the Board of Directors. In addition, the companies seek to maintain internal capital adequacy at levels higher than the minimum level of regulatory capital required.

The primary measure used to assess capital adequacy for the Jamaican based general insurance subsidiary is the Minimum Capital Test (MCT). This information is required to be filed with the Financial Services Commission (FSC) on an annual basis. The minimum standard recommended by the regulators for companies is a MCT of 250% (2015: 250%).

The banking and investment subsidiaries

The banking and investment subsidiaries' objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- (i) To comply with the capital requirements set by the regulators of the banking and Investment markets where the entities within the Group operate;
- (ii) To safeguard their ability to continue as going concerns so that they can continue to provide returns for stockholders and benefits for other stakeholders; and
- (iii) To maintain a strong capital base to support the development of business.

Capital adequacy and the use of regulatory capital are monitored monthly by management and the required information is filed monthly with the Bank of Jamaica (BOJ) and the FSC.

The BOJ requires the banking entity to:

- (i) Hold the minimum level of regulatory capital as a percentage of total assets of 8%; and
- (ii) Maintain a ratio of total regulatory capital to risk-weighted assets at or above 10%.

The FSC requires the investment services entity to:

- (i) Hold the minimum level of regulatory capital as a percentage of total assets of 6%; and
- (ii) Maintain a ratio of total regulatory capital to risk-weighted assets at or above 14%.

The regulatory capital as managed by the subsidiaries' ALCOs is divided into two tiers:

- Tier 1 capital: share capital, retained earnings and reserves created by appropriations of retained earnings. The book value of goodwill and negative fair value reserves are deducted in arriving at Tier 1 capital; and
- (ii) Tier 2 capital: general provisions for loan losses on assets limited to 1.25% of risk-weighted assets.

Risk-weighted assets are measured by means of a hierarchy of risk weights classified according to the nature of and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off-statement of financial position exposure, with some adjustments to reflect the more contingent nature of the potential losses.

The Group complied with the regulatory capital requirements to which it is subjected.

Notes to the Financial Statements

(expressed in Jamaican dollars unless otherwise indicated)

- 3. Insurance and Financial Risk Management (Continued)
 - (d) Capital management (continued)

Companies not requiring external regulatory capital requirements

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for owners and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. The Board of Directors monitors the return on equity, which the Group defines as net profit attributable to owners of the company divided by total owners' equity, excluding non-controlling interests. The Board of Directors also monitors the level of dividends to equity owners.

The Group monitors capital on the basis of the debt to equity ratio. This ratio is calculated as debt divided by owners equity. Debt is calculated as total borrowings as shown in the consolidated statement of financial position. Owners' equity is calculated as capital and reserves attributable to the company's owners as shown in the consolidated statement of financial position.

During 2016, the Group's strategy, which was unchanged from 2015, was to maintain a debt to equity ratio not exceeding 100%. The debt to equity ratios at 31 December 2016 and 2015 were as follows:

	Group	Group		
	2016 \$'000	2015 \$'000		
Total borrowings (Note 15)	13,242,037	13,936,107		
Owners equity	42,063,925	38,047,441		
Gearing ratio	31.5%	36.6%		

There were no changes to the Group's approach to capital management during the year.

The parent company complied with all externally imposed capital requirements to which it is subjected.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

4. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

Judgements and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Key sources of estimation uncertainty

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in Note 2 (g). The assessment of goodwill impairment involves the determination of the value in use. Determination of value in use involves the estimation of future cash flows from the business taking into consideration the growth rates, inflation rates and the discount rates. Any changes in these variables would impact the value in use calculations. A 1% increase in the discount rate would result in a reduction in the value in use by \$2,322,523,000, which would not result in an impairment of goodwill.

(ii) Income taxes

The Group is subject to income taxes in numerous jurisdictions. Significant judgement is required in determining the worldwide provision for income taxes. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made. The Group has recognised deferred tax assets on tax losses carried forward as it anticipates making future taxable income to offset these losses.

(iii) Pension plan assets and post-employment obligations

The cost of these benefits and the present value of the pension and the other post-employment liabilities depend on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net periodic cost (income) for pension and post-employment benefits include the expected long-term rate of return on the relevant plan assets, the discount rate and, in the case of the post-employment medical benefits, the expected rate of increase in medical costs. Any changes in these assumptions will impact the net periodic cost (income) recorded for pension and post-employment benefits and may affect planned funding of the pension plans. The expected return on plan assets assumption is determined on a uniform basis, considering long-term historical returns, asset allocation and future estimates of long-term investment returns. The appropriate discount rate is determined at the end of each year, which represents the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension and post-employment benefit obligations. In determining the appropriate discount rate, the interest rate of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid are considered, and that have terms to maturity approximating the terms of the related pension liability. The expected rate of increase of medical costs has been determined by comparing the historical relationship of the actual medical cost increases with the rate of inflation in the respective economies. Other key assumptions for the pension and post-employment benefits cost and credits are based in part on current market conditions.

(iv) Liabilities arising from claims made under insurance contracts

The determination of the liabilities under insurance contracts represents the liability for future claims payable by the insurance subsidiaries based on contracts for the insurance business in force at the statement of financial position date using several methods, including the Paid Loss Development method, the Incurred Loss Development method, the Bornhuetter-Ferguson Paid Loss method, the Bornhuetter-Ferguson Incurred Loss method and the Frequency-Severity method. These liabilities represent the amount of future premiums that will, in the opinion of the actuary, be sufficient to pay future claims relating to contracts of insurance in force, as well as meet the other expenses incurred in connection with such contracts. A margin for risk or uncertainty (adverse deviations) in these assumptions is added to the liability. The assumptions are examined each year in order to determine their validity in light of current best estimates or to reflect emerging trends in the insurance subsidiaries' experience.

Claims are analysed separately between those arising from damage to insured property and consequential losses. Claims arising from damage to insured property can be estimated with greater reliability, and the insurance subsidiaries' estimation processes reflect all the factors that influence the amount and timing of cash flows from these contracts. The shorter settlement period for these claims allows the insurance subsidiaries to achieve a higher degree of certainty about the estimated cost of claims, and relatively little IBNR is held at year-end. However, the longer time needed to assess the emergence of claims arising from consequential losses makes the estimation process more uncertain for these claims.

Notes to the Financial Statements
31 December 2016
(expressed in Jamaican dollars unless otherwise indicated)

4. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (Continued)

Key sources of estimation uncertainty (continued)

(v) Investment properties

Investment properties are carried in the statement of financial position at market value. The Group uses independent qualified property appraisers to value its investment properties annually, generally using the income approach. This approach takes into consideration various assumptions and factors including: the level of current and future occupancy, the rate of annual rent increases, the rate of inflation of direct expenses, the appropriate discount rate, and the current condition of the properties together with an estimate of future maintenance and capital expenditures. Reference is also made to recent comparable sales. A change in any of these assumptions and factors could have a significant impact on the valuation of investment properties.

(vi) Land and buildings

Freehold land and buildings are carried in the statement of financial position at fair value, with changes in fair value being recognised in 'capital and fair value reserve' through other comprehensive income. The Group uses independent qualified property appraisers to value its land and buildings bi-annually. Those fair values were derived using:

- The sales comparison approach, which references market-based evidence, using comparable prices adjusted for specific
 market factors such as nature, location and condition of the property. The most significant input into this valuation approach is
 price per square foot. Significant increases (decreases) in estimated price per square foot in isolation would result in a
 significantly higher (lower) fair value.
- The cost approach using observable inputs. The external valuers have determined these inputs based on the size, age and condition of the land and buildings and the state of the economy.

(vii) Fair value of financial instruments

In the absence of quoted market prices, the fair values of a significant portion of the Group's financial instruments were determined using generally accepted alternative methods. The values derived from applying these methods are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. Considerable judgement is required in interpreting market data to arrive at estimates of fair values. Consequently, the estimates arrived at may be significantly different from the actual price of the instruments in an arm's length transaction.

(viii) Impairment losses on loans

The Group reviews its loan portfolio to assess impairment at least on a monthly basis. In determining whether an impairment loss should be recorded in arriving at net profit or loss, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from loans. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a Group, or national or local economic conditions that correlate with defaults on assets in the Group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

Included in amortisation charges are amounts in respect of discontinued operations of \$Nil (2015: \$2,490,000).

Impairment tests for goodwill

The Group determines whether goodwill is impaired at least on an annual basis or when events or changes in circumstances indicate that the carrying value may be impaired. This requires an estimation of the recoverable amount of the cash generating unit (CGU) to which the goodwill is allocated. The recoverable amount is usually determined by reference to the value in use. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the CGU and also to choose an appropriate discount rate in order to calculate the present value of those future cash flows.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

11. Intangible Assets (Continued)

The allocation of goodwill to the Group's cash generating units (CGUs) identified according to segment is as follows:

	2016 \$'000	2015 \$'000
Food Trading		
- Jamaica operations	16,854	16,854
- United Kingdom operations	435,271	488,431
- United States operations	956,884	897,568
	1,409,009	1,402,853

For the year ended 31 December 2016, management tested for impairment the goodwill allocated to all the CGUs.

The recoverable amount of a CGU is determined based on value in use calculations. These calculations use cash flow projections based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated growth rates stated below. The growth rate does not exceed the long-term average growth rate for the industry in which the CGU operates.

Key assumptions used for value in use calculations:

	Revenue Growth Rate	EBITDA to Revenue	Expenditure to Revenue	Discount Rate
Food Trading				
- Jamaica operations	9.22%	3.14%	0.00%	12.46%
- United Kingdom operations	12.28%	5.53%	1.12%	11.10%
- United States operations	10.22%	3.01%	2.01%	9.57%

⁽a) The tables above include carrying values of \$81,862,000 (2015: \$13,408,000) and \$1,377,000 (2015: \$4,714,000) for the Group and the company, respectively, representing assets being acquired under finance leases. All amounts related to finance leases are shown in the 'Plant, Equipment, Fixtures & Vehicles' category of fixed assets.

Included in depreciation charges for the Group are amounts in respect of discontinued operations of \$Nil (2015: \$51,005,000).

Notes to the Financial Statements 31 December 2016 (expressed in Jamaican dollars unless otherwise indicated)

12. Fixed Assets (Continued)

(b) If land and buildings were stated on the historical cost basis, the amounts would be as follows:

	Grou	Group		Company	
	2016	2015	2016	2015	
	\$'000	\$'000	\$'000	\$'000	
Cost	4,288,983	4,232,904	41,123	41,123	
Accumulated depreciation	494,506	424,023	10,888	9,860	
Net Book Value	3,794,477	3,808,881	30,235	31,263	

(c) The Group's land and buildings were revalued during 2016 by independent valuers. The valuations were done on the basis of open market value, with the exception of the Distribution Centre, for which recent market transactions are not available due to the specialised nature of the assets. The revaluation surpluses, net of applicable deferred income taxes, were credited to the capital and fair value reserves in equity (Note 19).

13. Deferred Income Taxes

Deferred income taxes are calculated in full on temporary differences under the fiability method using principal tax rates of 25% for unregulated companies and 33 ½% for regulated companies.

The movement on the deferred income tax account is as follows:

	Group		Company	
	2016	2015	2016	2015
	\$1000	\$'000	\$'000	\$'000

Exchange differences	6,861	15,568	-	
At end of year	(596,649)	(87,670)	(981,093)	(880,836)

Notes to the Financial Statements
31 December 2016
(expressed in Jamaican dollars unless otherwise indicated)

13. Deferred Income Taxes (Continued)

Deferred income tax assets are recognised for tax losses carried forward to the extent that realisation of the related tax benefit through future taxable profits is probable. Subject to agreement with the taxation administration in the relevant jurisdictions, the Group has recognised tax losses of \$1,929,322,000 (2015: \$2,321,146,000) and recognised tax credits of \$148,175,000 (2015: \$214,080,000) to carry forward indefinitely against future taxable income. The Group also has unrecognised tax losses of \$1,048,252,000 (2015: \$894,671,000) in respect of some subsidiaries.

Deferred income tax liabilities of \$196,096,000 (2015: \$334,384,000) have not been established for the withholding taxes that would be payable on the unremitted earnings of certain foreign subsidiaries, as such amounts are permanently reinvested; such unremitted earnings totalled \$784,384,000 (2015: \$1,337,537,000).

The movement in deferred tax assets and liabilities (prior to offsetting of balances within the same tax jurisdiction) during the period is as follows:

	Group

(expressed in Jamaican dollars unless otherwise indicated)

13. Deferred Income Taxes (Continued)

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority. The following amounts, determined after appropriate offsetting, are shown in the consolidated statement of financial position:

	Group		Comp	any
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000
Deferred tax assets	801,008	1,019,904	-	-

Deferred tax liabilities net	(596,649)	(87,670)	(981,093)	(880,836)

14. Pensions and Other Post-Employment Obligations

The Group has both defined contribution pension schemes and a defined benefit pension scheme.

Defined contribution schemes

The defined contribution pension scheme is open to Jamaican based employees hired on or after 1 April 2010. Employees contribute 5% of pensionable earnings with the option to contribute an additional voluntary contribution of 5%. The employer contributions are currently set at 10%. The Group also has other defined contribution schemes open to employees of its foreign subsidiaries which are operated in those countries. The Group's and company's contributions for the year were \$248,811,000 (2015: \$253,135,000) and \$47,683,000 (2015: \$37,990,000) respectively.

Defined benefit scheme

The Group's defined benefit pension scheme, which commenced on 1 January 1975, is funded by employee contributions at 5% of salary with the option to contribute an additional 5%, and employer contributions at 0.02%, as recommended by independent actuaries. The last valuation was carried out at 31 December 2013. Pension at normal retirement age is based on 2% per year of pensionable service of the average of the highest three years' annual salary during the last ten years of service. This scheme was closed to new members as at 31 March 2010.

The Board of Trustees of the pension fund is comprised of representatives from both the employer and members of the plan. The Board of Trustees of the pension fund is required by law to act in the interest of the fund and all relevant stakeholders. The Board of Trustees of the fund is responsible for the investment policy with regard to the assets of the fund. The funds are managed by Proven Fund Managers Limited.

In the event of a plan surplus the Group is able to take a contribution holiday, while a funding deficiency will require the Group to make additional contributions to adequately fund the plan.

Notes to the Financial Statements 31 December 2016 (expressed in Jamaican dollars unless otherwise indicated)

14. Pension and Other Post-Employment Obligations (Continued)

Pension benefits

The amounts recognised in the statement of financial position are determined as follows:

	Group and Company	y
	2016	2015
	\$'000	\$'000
Present value of funded obligations	22,330,364 19,868	3,745
Fair value of plan assets	(28,472,442) (25,233	3,328)
Asset in the statement of financial position	(6,142,078) (5,364	4,583)

The movement in the defined benefit obligation over the year is as follows:

	Group and C	отрапу
	2016	2015
	\$'000	\$'000
Beginning of year	19,868,745	16,410,579
Current service cost	668,160	568,621

	2,332,149	2,118,483
Remeasurements -		<u>.</u>
Loss from change in demographic assumptions	-	1,133,131
Loss from change in financial assumptions	756,423	709,665
Experience gains	(209,576)	(39,519)
	546,847	1,803,277
Members' contributions	230,487	235,726
Benefits paid	(647,864)	(699,320)
End of year	22,330,364	19,868,745

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

14. Pensions and Other Post-Employment Obligations (Continued)

Pension benefits (continued)

The movement in the fair value of plan assets for the year is as follows:

	Group and Company		
	2016	2015	
	\$'000	\$'000	
Beginning of year	25,233,328	21,847,695	
Interest income on plan assets	2,116,694	2,061,518	
Return on plan assets, excluding amounts included in interest income	1,614,772	1,861,118	
Members' contributions	230,487	235,726	
Employers' contributions	740	750	
Benefits paid	(647,864)	(699,320)	
Administration costs	(75,715)	(74,159)	
End of year	28,472,442	25,233,328	

The amounts recognised in the income statement are as follows:

Group and C	ompany
2016	2015 \$'000
\$'000	
668,160	568,621
(452,705)	(511,656)
75,715	74,159
291,170	131,124
	2016 \$'000 668,160 (452,705) 75,715

As at the last valuation date, the present value of the defined benefit obligation was comprised of approximately \$12,421,257,000 (2015: \$11,188,440,000) relating to active employees, \$2,387,981,000 (2015: \$1,966,034,000) relating to deferred members and \$7,521,126,000 (2015: \$6,714,271,000) relating to members in retirement.

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

14. Pensions and Other Post-Employment Obligations (Continued) Pension benefits (continued)

The plan assets are comprised of:

Group and Company 2016 2015 \$'000 \$'000 % % Equity 9,497,567 34% 5,860,835 23% Debt 4,328,400 15% 13% 3,289,439 Real estate 2,492,811 9% 2,468,400 10% Government securities 10,385,674 36% 11,261,858 45% Other 1,767,990 6% 2,352,796 9% 28,472,442 100% 25,233,328 100%

The pension plan assets include the company's ordinary stock units with a fair value of \$1,809,915,000 (2015: \$1,257,073,000) and buildings occupied by Group companies with fair values of \$1,047,558,000 (2015: \$1,040,588,000).

The benefit that the company derives from the surplus of the pension plan is limited to the extent of the reduction in future contributions that it will make to the pension scheme.

Expected contributions by the Group to the post-employment scheme for the year ending 31 December 2017 are \$565,000. The actual return on plan assets was \$3,731,466,000 (2015: \$3,922,637,000).

The principal actuarial assumptions used were as follows:

	2016	2015
Discount rate	9.0%	8.5%
Long term inflation rate	6.0%	5.0%
Future salary increases	6.0%	6.0%
Future pension increases	6.0%	5.0%

Assumptions regarding future mortality experience are set based on advice, published statistics and experience.

The average life expectancy in years of a pensioner retiring at age 60 on the statement of financial position date is as follows:

	2016	2015
Male	27.24	27.18
Female	28.17	28.13

Notes to the Financial Statements

31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

14. Pensions and Other Post-Employment Obligations (Continued)

Pension benefits (continued)

The sensitivity of the defined benefit obligation to changes in the principal assumptions is:

Group and Company

	Impact on post-employment obligations							
	Change in Assumption	Increase in Assumption			Decrea	ise in Ass	umption	
			2016	2015		2016	2015	
Discount rate	1%	Decrease by	15.1%	15.2%	Increase by	19.7%	19.9%	
Future salary increases	1%	Increase by	4.7%	5.2%	Decrease by	4.2%	4.5%	
Expected pension increase	1%	Increase by	13.5%	13.2%	Decrease by	11.1%	10.9%	

Group and Company

	Impact on	post-empl	oyment ob	oligations		
	Increa	se in Assu by O	imption ne Year	Decrea	se in Assı by O	mption ne Year
		2016	2015		2016	2015
Life expectancy	Increase by	2.2%	2.1%	Decrease by	2.4%	2.3%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

Other post-employment obligations

The Group operates a number of post-emptoyment benefit schemes, principally in Jamaica. The benefits covered under the schemes include group life, insured and self-insured health care, gratuity and other supplementary plans. Funds are not built up to cover the obligations under these retirement benefit schemes. The method of accounting and the frequency of valuations are similar to those used for defined benefit pension schemes.

In addition to the assumptions used for the pension schemes, the main actuarial assumption is a long term increase in health costs of 7.5% per year (2015: 6.5% per year).

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

14. Pensions and Other Post-Employment Obligations (Continued)

Other post-employment obligations (continued)

The amounts recognised in the statement of financial position were determined as follows:

	Grou	р	Compa	any
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000
Present value of unfunded obligations	4,406,015	3,848,433	2,163,271	1,885,663

Movement in the defined benefit obligation is as follows:

	Group		Company	
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000

Risks associated with pension plans and post-employment plans

Through its defined benefit pension plan and other post-employment benefits, the Group is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The plan liabilities are calculated using a discount rate set with reference to Government of Jamaica bond yields; if plan assets underperform this yield, this will create a deficit.

As the plan matures, the Group intends to reduce the level of investment risk by investing more in assets that better match the liabilities. This process includes monitoring and rebalancing the asset classes and the maturity profile of assets within these classes. The Government bonds largely represent investments in Government of Jamaica securities.

However, the Group believes that due to the long-term nature of the plan flabilities, a level of continuing equity investment is an appropriate element of the Group's long term strategy to manage the plan efficiently.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

14. Pensions and Other Post-Employment Obligations (Continued)

Risks associated with pension plans and post-employment plans (continued)

Changes in bond yields

A decrease in Government of Jamaica bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.

Inflation risk

Higher inflation will lead to higher liabilities in the event that discretionary pension increases are granted. The majority of the plan's assets are either unaffected by (fixed interest securities) or loosely correlated with (equities) inflation, meaning that an increase in inflation has the potential to reduce the surplus or create a deficit.

Life expectancy

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant, where inflationary increases result in higher sensitivity to changes in life expectancy.

The Board of Trustees is ultimately responsible for the establishment and oversight of the plan's risk management framework, including monitoring the overall risk management process, as well as approving policies covering specific areas, such as limits for specific asset classes, foreign exchange risk, credit risk and investment of excess liquidity. The Board is responsible for monitoring the investment portfolio and investment strategies for the plan. A large portion of assets in 2016 consists of money market instruments, bonds and equities.

Funding levels are monitored on an annual basis and the current agreed contribution rate by the Group is 0.02% of pensionable salaries. The next triennial valuation is due to be completed for the plan's financial position as at 31 December 2016. The Group considers that the contribution rates set at the last valuation date to be sufficient to prevent a deficit. Regular contributions, which are based on service costs, will be assessed following the upcoming valuation to determine if any increase is required.

The average duration of the post-employment obligations is as follows:

Plans	Years
Gratuity Plan	9.7
Group Life Plan	
Insured Group Health	15.2
Pension Plan	20.9
	18.0
Self Insured Health Plan	14.2
Superannuation plan	7.7

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

15. Bank and Other Loans

	Gro	dno	Comp	oany
	2016 \$'000	2015 \$'000	2016	2015
Secured on assets	3,715,816	3,649,231	\$'000	\$'000
Unsecured	9,526,221	10,286,876	4,446,639	4,735,644
	13,242,037	13,936,107	4,446,639	4,735,644

(a) Unsecured loans of subsidiaries are supported by letters of comfort from the parent company. Interest rates on these loans range between 2.25% - 12.0% (2015: 2.5% - 12.0%).

(b) Bank and other loans comprise:

	Gro	Group		pany
	2016	2015	2016	2015
Posts avantage (Nature 5)	\$'000	\$'000	\$'000	\$'000
Bank overdrafts (Note 5)	1,965,846	2,827,358	1,054,809	937,205
Bank borrowings	8,440,040	7,078,993	2,622,262	3,008,526
Finance leases	78,153	10,931	7,171	16,800
Other loans	2,757,998	4,018,825	762,397	773,113
Total borrowings	13,242,037	13,936,107	4,446,639	4,735,644

Finance lease liabilities are effectively secured as the rights to the leased asset revert to the lessor in the event of default. Certain bank borrowings are secured on the assets of subsidiaries that have the loans. All other borrowings are unsecured. Included in bank borrowings and other loans is interest payable of \$94,115,000 (2015: \$99,481,000) and \$27,964,000 (2015: \$38,228,000) for the Group and the company, respectively.

included in bank borrowings and other loans is \$7,898,778,000 (2015: \$7,937,404,000) and \$3,284,030,000 (2015: \$3,176,052,000) for the Group and the company respectively, which matures in the next 12 months.

The fair value of current borrowings approximates their carrying amount, as the impact of discounting is not significant. The fair values are based on cash flows discounted using a rate based on the borrowing rate of 6.10% (2015: 5.81%) and are within level 2 of the fair value hierarchy.

(c) Finance lease liabilities - minimum lease payments:

Treasury shares	(2,508)	(917)	(89,297)	(18,089)
Issued and outstanding	992,379	991,920	534,249	567,789

- (a) On 11 July 2016, at an extraordinary general meeting of the company, the shareholders approved the subdivision of each ordinary share into three ordinary shares with effect from 11 August 2016. To facilitate this subdivision of shares, the maximum number of shares that the company is authorised to issue was increased from 400,000,000 to 1,200,000,000. As a result of the stock split, all prior period stock data presented in the financial statements have been adjusted to reflect the subdivision.
- (b) During the year, the company issued 2,050,000 (2015: 54,000) shares to its employees for cash of \$37,668,000 (2015: \$879,000). The shares were issued under the Directors and Senior Managers Stock Option Plans. The company, under its share buy-back programme which commenced in 2013, repurchased Nil (2015: 885,000) units at a fair value of \$Nil (2015: \$18,799,000).
- (c) During the year, the company through its employee investment trust sold 324,000 (2015: Nil) units of its own shares at a fair value of \$13,418,000 (2015: \$Nil), purchased 5,447,000 (2015: 171,000) units at a fair value of \$205,952,000 (2015: \$2,824,000) and transferred 3,532,000 (2015: Nil) units to employees at a fair value of \$146,669,000 (2015: \$Nil). The total number of treasury shares held by the company at the end of the year was 2,508,000 (2015: 917,000) at a cost of \$89,297,000 (2015: \$18,089,000).
- (d) At the Annual General Meeting held on 29 May 2003, the stockholders passed a resolution for 30,000,000 of the authorised but unissued shares to be set aside for allocation and sale to the managers of the company. The allocation and sale of these shares will be governed by the provisions of the 2003 Stock Option Plan for the Managers of GraceKennedy Limited.

On 6 January 2011, under the rules of the Stock Option Plan, the following allocation was made:

Senior managers

No. of Shares 8,796,024

The options were granted at a subscription price of \$16.94, being the weighted average price of the company's shares on the Jamaica Stock Exchange for the previous ten days prior to the grant date, and are exercisable over a period of six years, at the end of which time unexercised options will expire. One-third of the total of the grant to each senior manager will vest on each anniversary of the grant. The plan provides for equitable adjustment of the allocated number of shares by reason of stock splits, combinations or exchanges of shares, stock dividends, bonus issue, and reclassifications or similar corporate changes.

18. Share Capital (Continued)

(e) At the Annual General Meeting held on 27 May 2009, the stockholders passed a resolution for authorised but unissued shares up to a maximum of 7½% of the total number of issued shares of no par value to be set aside for allocation and sale to the directors, managers and employees of the company. The allocation and sale of these shares will be governed by the provisions of the 2009 Stock Offer Plan for the Directors, Managers and Employees of GraceKennedy Limited and the plan provides for equitable adjustment of the allocated number of shares by reason of stock splits, combinations or exchanges of shares, stock dividends, bonus issue, and reclassifications or similar corporate changes.

On 3 January 2011, under the rules of the Stock Offer Plan, the following allocation was made:

No. of Shares

Directors

1,085,184

The options were granted at a subscription price of \$16.75, being the weighted average price of the company's shares on the Jamaica Stock Exchange for the previous three days prior to the grant date, and are exercisable over a period of six years, at the end of which time unexercised options will expire. The total of the grant to each director will fully vest on the third anniversary of the grant.

At 31 December	1,334	3,213

(f) In 2016, the company commenced operating a Long Term Incentive (LTI) Scheme administered by a committee of the Group's Board of Directors. The scheme is governed by the provisions of the 2009 Stock Offer Plan and includes the offer of restricted stock grants and stock options to executive directors and other senior executives. Participating executives are eligible to receive awards of restricted stock grants once certain predetermined Group performance objectives are met. These awards are earned annually following achievement of the performance objectives and are subject to a two year holding period from the end of the performance year after which the stock grants will vest and the executive will be entitled to receive the stock units. The stock option portion of the LTI scheme is granted annually and vesting is dependent on a time-based criterion.

On 12 May 2016 the following allocation of stock options was made:

No. of Shares

Directors and senior executives

2,551,665

The options were granted at a subscription price of \$28.00, being the weighted average price of the company's shares on the Jamaica Stock Exchange for the previous three days prior to the grant date. The total of the grant to each director and senior executive will fully vest on the third anniversary of the grant. After vesting executives will have up to five years to exercise the stock options.

(g) Movements in the number of share options outstanding and their related weighted average exercise price are as follows:

	2016	2016			
	Average exercise price	Options	Average exercise price	Options	
Movement on this option:	in \$ per share	'000	in \$ per share	'000	
At 1 January	17.99	10,527	17.95	10,875	
Granted	26.44	2,972			
Exercised	17.71	(8,303)	16.94	(54)	
Forfeited	•	-	16.94	(294)	
At 31 December	23.26	5,196	17.99	10,527	

Shares totalling 2,643,000 (2015: 10,527,000) are exercisable at the statement of financial position date.

Share options outstanding at the end of the year have the following expiry date and exercise prices:

		2016	2015
	Exercise price in \$ per	Options	Options
	share	'000	'000
2016	16.93	-	7,314
2017	20.40	2,644	3,213
2023	28.00	2,552	
		5,196	10,527

(h) The fair value of options granted determined using the Black-Scholes valuation model was \$157,411,000. The significant inputs into the model were the weighted average share prices ranging from \$17.00 to \$28.00 at the grant dates, exercise prices ranging from \$16.94 to \$28.00, standard deviation of expected share price returns ranging from 29.2% to 33.2%, option life of six and eight years and risk-free interest rates ranging between 5.82% to 7.48%. The volatility measured at the standard deviation of expected share price returns is based on statistical analysis of daily share prices over the term of the options. The fair value of potential restricted stock grants to be earned is \$105,865,000.

The expense recognised in the income statement for share-based payments was \$23,816,000 (2015: \$Nii).

20. Banking Reserves

Banking reserves represent both those reserves required to be maintained by the banking subsidiary, First Global Bank Limited (FGB), in compliance with the Jamaica Banking Services Act; as well as additional reserves that the Banking Services Act permits FGB to transfer from net profit to constitute part of its capital base for purposes of determining the maximum level of deposit liabilities and lending to customers.

21. Other Reserves

		Group		Company
	Foreign Currency Translation \$'000	Share-based Payments \$'000	Total	Share-based Payments \$'000
Balance at 1 January 2015	3,582,479	-	3,582,479	-

(expressed in Jamaican dollars unless otherwise indicated)

22. Non-Controlling Interests (Continued)

All subsidiary undertakings are included in the consolidation. The proportion of the voting rights in the subsidiary undertakings held directly by the parent company do not differ from the proportion of ordinary shares held. The parent company further does not have any shareholdings in the preference shares of subsidiary undertakings included in the Group.

The total non-controlling interest for the period is \$1,474,683,000 of which \$1,436,439,000 is for GraceKennedy Money Services Caribbean SRL. The Group's shareholding in Hardware and Lumber Limited was disposed of in 2015. The non-controlling interest in respect of other subsidiaries is not material.

In 2016, the Group increased its shareholdings in EC Global Insurance Company Limited from 80% to 89.3% through the purchase of additional shares issued by that company. This intra-Group transaction resulted in the dilution of non-controlling interests shown in the table above as a transfer of \$1,983,000.

Summarised financial information on subsidiaries with material non-controlling interests.

Set out below are the summarised financial information for each subsidiary that has non-controlling interests that are material to the Group. Summarised statement of financial position

(expressed in Jamaican dollars unless otherwise indicated)

23. Segment information

Management has determined the operating segments based on the reports reviewed by the Executive Committee that are used to make strategic decisions. The Group has four reportable segments which are based on the different types of products and services that it offers. These products and services are described in its principal activities (Note 1). The reportable segments derive their revenue primarily from food trading and financial services. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies (Note 2). The Group evaluates performance on the basis of profit or loss before tax expense not including postemployment benefits, share-based payments and net corporate central office costs which are shown in unallocated amounts. Segment information also excludes discontinued operations.

The segment information provided to management for the reportable segments is as follows:

Operating segments

Notes to the Financial Statements 31 December 2016 (expressed in Jamaican dollars unless otherwise indicated)

28. Taxation

Taxation is based on the profit for the year adjusted for taxation purposes:

	Group		Company	
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000
Current tax	1,686,038	1,436,657	6,841	29,836
Adjustment to prior year provision	(119,115)	(190,581)	-	(342)
Deferred tax (Note 13)	1,545	35,063	(162,927)	(74,939)
	1,568,468	1,281,139	(156,086)	(45,445)
Taxation expense is attributable to:				
Profit from continuing operations	1,568,468	1,271,291	(156,086)	(45,445)
Profit from discontinued operations		9,848	•	-
	1,568,468	1,281,139	(156,086)	(45,445)

The tax on the Group's and company's profit before tax differs from the theoretical amount that would arise using the tax rate of the home country of the company as follows:

	Group		Company	
	2016	2015	2016	2015
	\$'000	\$'000	\$'000	\$'000
Profit before tax from continuing operations	6,103,330	4,303,813	1,581,155	2,338,411
Profit before tax from discontinued operations		231,346	-	•
	6,103,330	4,535,159	1,581,155	2,338,411
Tax calculated at a tax rate of 25%	1,525,833	1,133,790	395,289	584,603
Adjusted for the effects of:				
Different tax rates in other countries	(12,532)	(83,059)		_
Different tax rate of regulated Jamaican companies	216,993	243,889	-	-
Income not subject to tax	(245,032)	(200,894)	(563,923)	(667,199)
Expenses not deductible for tax purposes	316,096	474,732	14,897	37,231
Adjustment to prior year provision	(119,115)	(190,581)	-	(342)
Share of profits of associates included net of tax	(110,288)	(79,048)	-	
Employment tax credit	(2,441)	(13,944)	-	_
Recognition/utilisation of previously unrecognised tax losses	-	(4,056)	-	
Other	(1,046)	310	(2,349)	262
Tax expense/(credit)	1,568,468	1,281,139	(156,086)	(45,445)

		1,010,423	820,030

31. Earnings Per Stock Unit

Basic earnings per stock unit is calculated by dividing the net profit attributable to owners by the weighted average number of ordinary stock units outstanding during the year.

	2016	2015
Net profit attributable to owners:		
From continuing operations (\$'000)	4,004,539	2,617,326
From discontinued operations (\$'000)		142,172
	4,004,539	2,759,498
Neighted average number of stock units outstanding ('000)	991,445	991,902
Basic earnings per stock unit:		•
From continuing operations (\$)	4.04	2.64
From discontinued operations (\$)		
		0.14
	4.04	2.78

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

31. Earnings Per Stock Unit (Continued)

The diluted earnings per stock unit is calculated by adjusting the weighted average number of ordinary stock units outstanding to assume conversion of all dilutive potential ordinary stock units.

- (a) 2,551,000 (2015: 3,891,000) ordinary stock units for the full year in respect of stock options for directors.
- (b) 2,645,000 (2015: 6,636,000) ordinary stock units for the full year in respect of the stock options for managers.

Net cash provided by operating activities	11,122,250	2,490,497	2,474,065	1,714,006

33. Commitments

(a) Future lease payments under operating leases at 31 December 2016 were as follows:

		\$'000
In financial year	2017	1,309,118
	2018	1,267,758
	2019	1,017,688
	2020	795,016
	2021	623,073
	2022 and beyond	1,238,355

(b) Prior to the authorisation of the financial statements, the Group had \$2,352,326,000 (2015: \$64,686,000) in authorised capital expenditure for which it had established contracts.

34. Contingent Liabilities

(a) In 2000, a suit was filed jointly against a subsidiary, GraceKennedy Remittance Services Limited ("GKRS") and a software developer by Paymaster (Jamaica) Limited (Paymaster), a bills payment company. The suit claimed damages arising out of, amongst other allegations, the use by the subsidiary of certain software, to which Paymaster alleged it owned the copyright.

In the judgment handed down by the Supreme Court on 30 April 2010, the Court ruled in favour of GKRS and the software developer on all claims. Accordingly, the Court ordered costs to be paid by Paymaster to GKRS and the software developer and an enquiry into any damages suffered by GKRS and the software developer as a result of an injunction obtained by Paymaster in the suit. On 10 June 2010, Paymaster filed an appeal against the decision of the Supreme Court in the Court of Appeal and applied for a stay of execution, pending the appeal. Further to an application made by Paymaster to the Court of Appeal the enquiry into damages resulting from the injunction by the Supreme Court was on 6 May 2011 stayed pending appeal.

On 27 March 2015, the Court of Appeal handed down judgment, finding against GKRS in respect of one of the grounds of appeal. Based on advice from the Company's attorneys, GKRS is confident that it has a strong basis for appeal to the Privy Council and instructed its attorneys to proceed to file the necessary documents to facilitate the appeal. On 21 September 2015, the Court of Appeal granted both GKRS and Paymaster conditional leave to appeal to the Privy Council against its decision and also granted each of these parties a stay of execution of the Court of Appeal judgment pending appeal to the Privy Council. Final leave to appeal to the Privy Council was granted and the hearing of the appeals has been listed for 24 October 2017, for one day.

As the Court had previously ordered that the trial of the matter should be split as to liability and damages with the assessment of damages deferred until the liability issue has been settled, the damages applicable would be subject to assessment by the Supreme Court and cannot therefore be reasonably estimated at this stage. Based on this, as well as the fact that GKRS has a strong basis of appeal having regard to Counsel's advice, no amounts have accordingly been provided for in these financial statements in respect of this matter.

(b) Various companies in the Group are involved in certain legal proceedings incidental to the normal conduct of business. The management of these companies believes that none of these proceedings, individually or in aggregate, will have a material effect on the Group.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

36. Fair Values Estimation

Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following tables provide an analysis of the Group's and company's financial instruments held as at 31 December that, subsequent to initial recognition, are measured at fair value. The financial instruments are grouped into levels 1 to 3 based on the degree to which the fair values are observable, as follows:

- Level 1 includes those instruments which are measured based on quoted prices in active markets for identical assets or liabilities.
- Level 2 includes those instruments which are measured using inputs other than quoted prices within level 1 that are observable for the
 asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 includes those instruments which are measured using valuation techniques that include inputs for the instrument that are not based on observable market data (unobservable inputs).

The fair value of financial instruments traded in active markets is based on quoted market prices at the statement of financial position date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1. Instruments included in level 1 comprise primarily equity investments listed on a public stock exchange classified as trading securities or available-for-sale.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

Specific valuation techniques used to value financial instruments include:

- Quoted market prices or dealer quotes for similar instruments.
- The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows based on observable yield curves.
- The fair value of forward foreign exchange contracts is determined using forward exchange rates at the statement of financial position date, with the resulting value discounted back to present value.
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

36. Fair Values Estimation (Continued)

Financial Instruments (continued)

Note that all of the resulting fair value estimates are included in level 2 except for certain corporate bonds as explained below.

The following table presents the changes in level 3 instruments for the years ended 31 December.

	Group	
	2016 20	15
	\$'000 \$'0	000
At beginning of year	103,356 310,6	356
Acquisitions	227 51,6	329
Disposals	(102,614) (258,9	3 29)
At end of year	969 103,3	356

There were no transfers between the levels during the year.

Fair Value of Land and Buildings and Investment Properties

An independent valuation of the Group's land and buildings was performed by valuers to determine the fair value of the land and buildings as at 31 December 2016. The revaluation surplus net of applicable deferred income taxes was credited to other comprehensive income and is shown in 'capital and fair value reserves' in shareholders' equity (Note 19). The following table analyses the non-financial assets carried at fair value, by valuation method. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or flability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

Land and buildings and investment properties are classified as level 3. The valuations have been performed using the sales comparison and income approaches for all properties except the Distribution Centre, which is valued using the cost approach.

The carrying value of land and buildings classified as level 3 is \$5,844,749,000 (2015: \$5,270,933,000) and \$74,000,000 (2015: \$65,695,000) for the Group and company respectively. Included in Group's land and buildings is the Distribution Centre with a carrying value of \$3,285,000,000 (2015: \$2,978,398,000).

The carrying value of investment properties classified as level 3 is \$584,000,000 (2015: \$532,000,000).

Reconciliation of the opening and closing balances of the Group's land and buildings:

	Distribution center	Other land and buildings	Total	Distribution center	Other land and buildings	Total

Closing balance	3,285,000	2,559,749	5,844,749	2,978,398	2,292,535	5,270,933	

There were no transfers to/from Level 3 during the year.

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

36. Fair Values Estimation (Continued)

Fair Value of Land and Buildings and Investment Properties (continued)

A reconcitiation of the opening and closing balances for the company's land and buildings and the Group's investment properties are disclosed in Notes 12 and 39 respectively.

Valuation processes of the Group

On a biennial basis, the Group engages external, independent and qualified valuers to determine the fair value of the Group's land and buildings. The most recent valuations were performed as at 31 December 2016. The Group engages external, independent and qualified valuers to determine the fair value of its investment properties on an annual basis.

Sales Comparison Approach

There have been a limited number of similar sales in the local market, and consequently the sales comparison approach incorporates unobservable inputs which in the valuator's judgement reflects suitable adjustments regarding size, age, condition, time of sale, quality of land and buildings and improvements. The most significant input into this valuation is the price per square foot. The higher the price per square foot the higher the fair value.

Income Approach

The projected net income of the subject properties are discounted using an appropriate capitalisation rate. The most significant inputs to this valuation is the rental rate per square foot and the capitalisation rate. Rental rates of the subject properties are adjusted to reflect the market rent for properties of similar size, location and condition. The higher the rental rate per square foot the higher the fair value. The higher the capitalisation rate the lower the fair value. The average rent per square foot ranges between \$450 to \$500 and the capitalisation rate ranges between 9% - 10%.

Cost Approach

The fair value of the Distribution Centre has been determined using the cost approach due to specialised nature of the asset. The key inputs into this valuation are shown in the table below.

		Di:	stribution Centre		
	Fair value at 31 December 2016	Fair value at 31 December 2015 Valuation		Range of	Relationship of unobservable
Description	\$'000	\$'000 technique(s)	Unobservable inputs	inputs	inputs
Distribution centre	3,285,000	2,978,398 Cost approach	Certified costs of construction as at date of completion of property	US\$21,500,000 - US\$22,000,000	The higher the costs of construction the higher the fair value
			Rate of increase in construction costs from date of last valuation	2016: 10% - 12% 2015: 14% - 17%	The higher the rate of increase in construction costs the higher the fair value
			Professional fees - architects, quantity surveyors, engineers	8%	The higher the professional fees the higher the fair value
			Interest cost	2016: 10% - 12% 2015: 12% - 15%	The higher the interest cost the higher the fair valu
			Estimated profit margin required by developer	5%	The higher the developer's profit the higher the fair value
			Rate of obsolescence	9%	The higher the rate of obsolescence the lower the fair value
	3,285,000	2,978,398

38. Derivative Financial Instruments

Derivatives are carried at fair value in the statement of financial position as either assets or liabilities. Asset values represent the cost to the Group of replacing all transactions with a fair value in the Group's favour assuming that all relevant counterparties default at the same time, and that transactions can be replaced instantaneously. Liability values represent the cost to the Group's counterparties of replacing all their transactions with the Group with a fair value in their favour if the Group was to default. The fair values are set out below:

	Group				
	2016		2015		
	Assets \$'000	Liabilities \$'000	Assets \$'000	Liabilities \$'000	
Embedded put option issued by Government of Jamaica	86,223			-	
Total	86,223	•			

The Group holds certain Government of Jamaica debt securities which mature in February 2024. The terms of these securities contain an investor put option exercisable in February 2018 under which the holder may require the Government of Jamaica to redeem the securities at 100% of the principal value plus any accrued interest.

39. Investment Properties

	Group		
	2016	2015	
	\$'000	\$'000

Notes to the Financial Statements 31 December 2016

(expressed in Jamaican dollars unless otherwise indicated)

40. Disposal of Subsidiary

In the prior year, the Group disposed of its 58.1% interest in Hardware & Lumber Limited (H&L) which was previously reported under the Retall & Trading operating segment. The principal activities of H&L comprised merchandising agricultural supplies, home improvement supplies, and hardware and lumber. H&L is reported as a discontinued operation.

The following tables summarise the financial performance and cash flow information relating to the discontinued operation as well as the net assets and net proceeds from the disposal of the subsidiary:

Analysis of the result of discontinued operations and the gain on disposal of the assets constituting the discontinued operations is as follows:

	2016	2015 \$'000
	\$'000	
Revenue	•	7,442,223
Expenses	_	(7,278,199)

Sales proceeds net of transaction costs	
Cash and cash equivalents of disposed subsidiary	858,441
	(201,176)
Net cash inflow on disposal of subsidiary	657,265

41. Subsequent Event

- (a) On 28 February 2017, the Board of Directors approved an Interim dividend in respect of 2017 of 30 cents per ordinary stock unit. The dividend is payable on 18 May 2017 to shareholders on record as at 1 May 2017.
- (b) Effective 1 March 2017, the following changes to the Cash Reserves and Liquid Assets Ratio were announced by the Bank of Jamaica:
 - (i) The cash reserves requirement of commercial banks with respect to foreign currency prescribed liabilities will be increased by two percentage points to fourteen percent (14%). The cash reserves requirement with respect to local currency prescribed liabilities will remain unchanged at twelve per cent (12%).
 - (ii) The liquid assets ratio applicable to foreign currency prescribed liabilities will be increased by two percentage points to twenty-eight per cent (28%), while the liquid assets ratio applicable to local currency prescribed liabilities will remain unchanged at twenty-six per cent (26%).

These changes will have the effect of increasing the cost of funds for the Group's commercial banking subsidiary.
